

Vicinity™ Workstation Clamps

Product Guide

Product Overview

Vicinity™ Workstation Clamps are exclusively designed for easy installation with Vicinity Workstation Screens and are made from 100% recycled PET through a unique and industry-first pelletizing process called RePET. This process transforms in-house waste into pellets, which are then injection-molded to create clamps and other Autex Acoustics® accessories. RePET has diverted 897,360 lbs of waste from landfills to date, creating a truly circular lifecycle.*

Because the Vicinity Workstation Screens and Clamps are made entirely from PET, they can be easily disassembled and recycled repeatedly through the RePET process, supporting sustainability at every stage.

*Data calculated as of December 2025 and subject to future updates.

Sustainable Material

- Recycled content:
 - 100% recycled material (clamp)
- Pathway to zero waste manufacturing initiative
- Sustainable supply chain and anti-modern slavery program
- Low VOC and CDPH compliant
 - <0.092 mg/m3 (7 days)

Patented Design

Vicinity Workstation Clamps feature a patented design that makes installation with Vicinity Workstation Screens easy and creates a sleek aesthetic to complement any workspace.
