

Behringer WING-DANTE Update Instructions

For updates with WING Firmware 3.0.6+ or Module Relocation

Starting with WING Firmware 3.0.6, updated configurations are required for both the internal Dante module and the external WING-DANTE expansion card.

Follow these instructions to update the Dante module firmware in the following cases:

- You are updating your console to firmware 3.0.6 or higher from version 3.0.5 or lower and are using WING-DANTE or the internal WING-DANTE AioP module.
- You are moving the Dante module between the external WING-DANTE card slot and the internal Dante module slot on the WING console.

Firmware Update Procedure

1. Download the correct firmware file from [behringer.com](https://www.behringer.com). The following files are available:
 - wing64x64_B_int_BK2 (internal module, Brooklyn II, console FW 3.0.6+)
 - wing64x64_B_int_BK3 (internal module, Brooklyn 3, console FW 3.0.6+)
 - wing-dante64_B_ext_BK2 (external expansion card, Brooklyn II, console FW 3.0.6+)
 - wing-dante64_B_ext_BK3 (external expansion card, Brooklyn 3, console FW 3.0.6+)
2. Open Dante Updater on your computer.
3. Click the dropdown menu in the top-right corner and select Advanced Settings.
4. Enable the following options:
 - ✓ ALLOW IMPORTED FIRMWARE
 - ✓ Allow override of device matching

Click APPLY to confirm.

5. Navigate to LIBRARY › IMPORTED FILES › IMPORT FIRMWARE and import the firmware file you downloaded in step 1.

6. Go to the HOME tab and locate the Dante module or external expansion card in the UPDATE(S) AVAILABLE list.
7. Click UPDATE SELECTED DEVICES, check the box "I understand that audio will be interrupted", and click UPDATE NOW.
8. Wait for the update process to complete.
9. Once prompted, check the REBOOT REQUIRED box and click REBOOT SELECTED DEVICES.
