

Behringer JT MINI Firmware

Version 1.0.10 (03 April 2025)

We are pleased to announce the release of firmware v1.0.10 for the Behringer JT MINI. This update includes several improvements and bug fixes to enhance performance and stability.

Improvements & Bug Fixes:

- **Pitch Bend Reset:** The pitch bend range resets to the default value of 2 semitones.
- **ARP Synchronization:** Fixed an issue where the first note was lost during DAW-synchronized playback.
- **Poly Mode Clicking:** Resolved an issue that caused clicking sounds in poly mode.
- **MIDI Input Tolerance:** Increased the tolerance time for note reception from MIDI keyboards and the touch keyboard, enabling proper polyphonic envelope release in POLY mode.
- **Delay Time Modulation:** Corrected the behaviour of DELAY TIME:
 - When DELAY TIME is greater than 0, modulation now applies gradually.
 - When DELAY TIME is set to 0, modulation takes effect immediately.

This update ensures a smoother and more reliable experience when using the JT MINI.

We recommend all users update to this latest firmware.

Download the latest **SynthTribe** app and follow the update instructions. Before installing, ensure your operating system is supported:

- **Mac:** Compatible with the latest three versions (macOS 13, 14, and 15)
- **Windows:** Supports Windows 10 and 11
