

Behringer LM DRUM Firmware

Version 1.2.1 (30 April 2025)

We're pleased to announce the release of firmware version 1.1.9 for the Behringer LM DRUM. This update includes several key bug fixes and usability improvements to enhance overall stability and performance.

Bug Fixes:

- Resolved a gate noise issue that occurred when triggering voices immediately after powering on the unit.
- Fixed a problem that caused dropped notes when playing incoming MIDI notes.
- Addressed an error when restoring an empty .ars file could cause a sample loading issue.
- Fixed an issue where some voices could drop notes when switching banks during SONG or SETLIST playback.

Improvements:

- Enabled manual page switching while Auto Scroll is active, when the sequencer is stopped.
- Previously, manual page switching was disabled when Auto Scroll was enabled, pages would only advance automatically during playback. With this update, users can now switch pages manually in most screens, when the sequencer is stopped.
- Minor enhancement to the system font library for improved legibility.
