Firmware update process with SimplyPUT

1. Download and install SimplyPUT from midasconsoles.com (available for MacOS, Windows and Linux).
2. Connect the powered off HUB4 PRO to a computer via USB.
3. Hold down the button "StageConnect To AES50-IN" while turning on the HUB4 PRO until all buttons 1 - 4 turn green.
4. Open SimplyPUT. The app will detect the device automatically.
5. Select the firmware version you want to install and click on Update.
6. Restart the HUB4 PRO after the device's LEDs stop flashing and disconnect it from the computer.
