Key Themes to Note

At the core is industrial information management & bringing engineering and operational **asset-based** information together.

- Foundational role of the PI System and **PI Asset Framework** in AVEVA's portfolio and synergy value opportunity with deep integration with the broader AVEVA portfolio
- Extension and augmentation of the PI System with AVEVA Data Hub for secure, governed information sharing, a key capability as we move to a community model
- AVEVA portfolio is built from the ground up with **industrial information** at the core from both organic and acquisition of market-leading solutions like OSIsoft, Telvent Oasys, Invensys, SPIRAL, etc..
- A focus on the connected worker and the acceleration of remote operations and collaboration centers
- Open and agnostic nature – and **interoperability** - of AVEVA's portfolio with 3rd party applications – protecting and leveraging prior investments
- Key role of partner/SI ecosystem to realize full benefit from solutions

What's Next?

- Look out for the O&G area signs in the expo and dinner tonight!
- Tomorrow is a full day of portfolio technical deep dives and roadmap session – **your prior investment will be protected and supported going forward**
- **Leverage the Industry Principal team – we are here to help you:**
 - "Art of the possible" executive briefings
 - Synergy value discussions
 - Digital transformations - Linking business and digital strategy with OPEX with AVEVA
