Faster, Smarter & More Accurate construction estimating software

RIB CostX is an **easy to understand** and use, **all-in-one** takeoff, estimating and reporting solution, that has a **familiar spreadsheet feel and flexibility**, is highly accessible with **deployment options to suit all** organisations, and is **highly adaptable** to workflows and requirements of different projects, regions, roles, and industries.

RIB CostX ensures that consultants can price the costs of projects at each stage, for presentation in reports that align with diverse region-specific, industry-specific and project-specific requirements faster and more accurately than any other system.

The Benefits of RIB CostX

Finish Work Quickly

Complete takeoff and estimates faster by saving time on repetitive measurement tasks and using pre-existing templates.

Ensure Error-Free Estimates

Utilise quantity takeoff for estimates seamlessly in one software package, ensuring you can manage large amounts of data quickly and easily while avoiding errors.

Evolve Your Practices

Ensure you're on top of the latest industry developments such as BIM and embodied carbon with a continually developing system.

Provide Valuable Input

With a fast turnaround, consultants can play a key role in the construction chain, applying their skillset to improve the end result.

RIB CostX All-In-One System with seamless integration of BIM & 2D takeoff and estimating

Finish Work Quickly

Improve design quality, reduce errors and add value while future-proofing your business.

2D Takeoff

Streamline measuring processes by calculating areas, lengths and counts with a single click.

Estimating Spreadsheets

Live-linked to drawings, ensuring all necessary information can be found in the one place.

Revisions Tracking

Be confident that design changes are clearly identified throughout the process.

Embodied Carbon Calculations

Add value to the project by assessing the long-term energy implications.

Subcontractor Comparison

Save time and make a well-informed decision on specialised work.

Professional Reports

Showcase work to clients with customised, professional quality outputs.

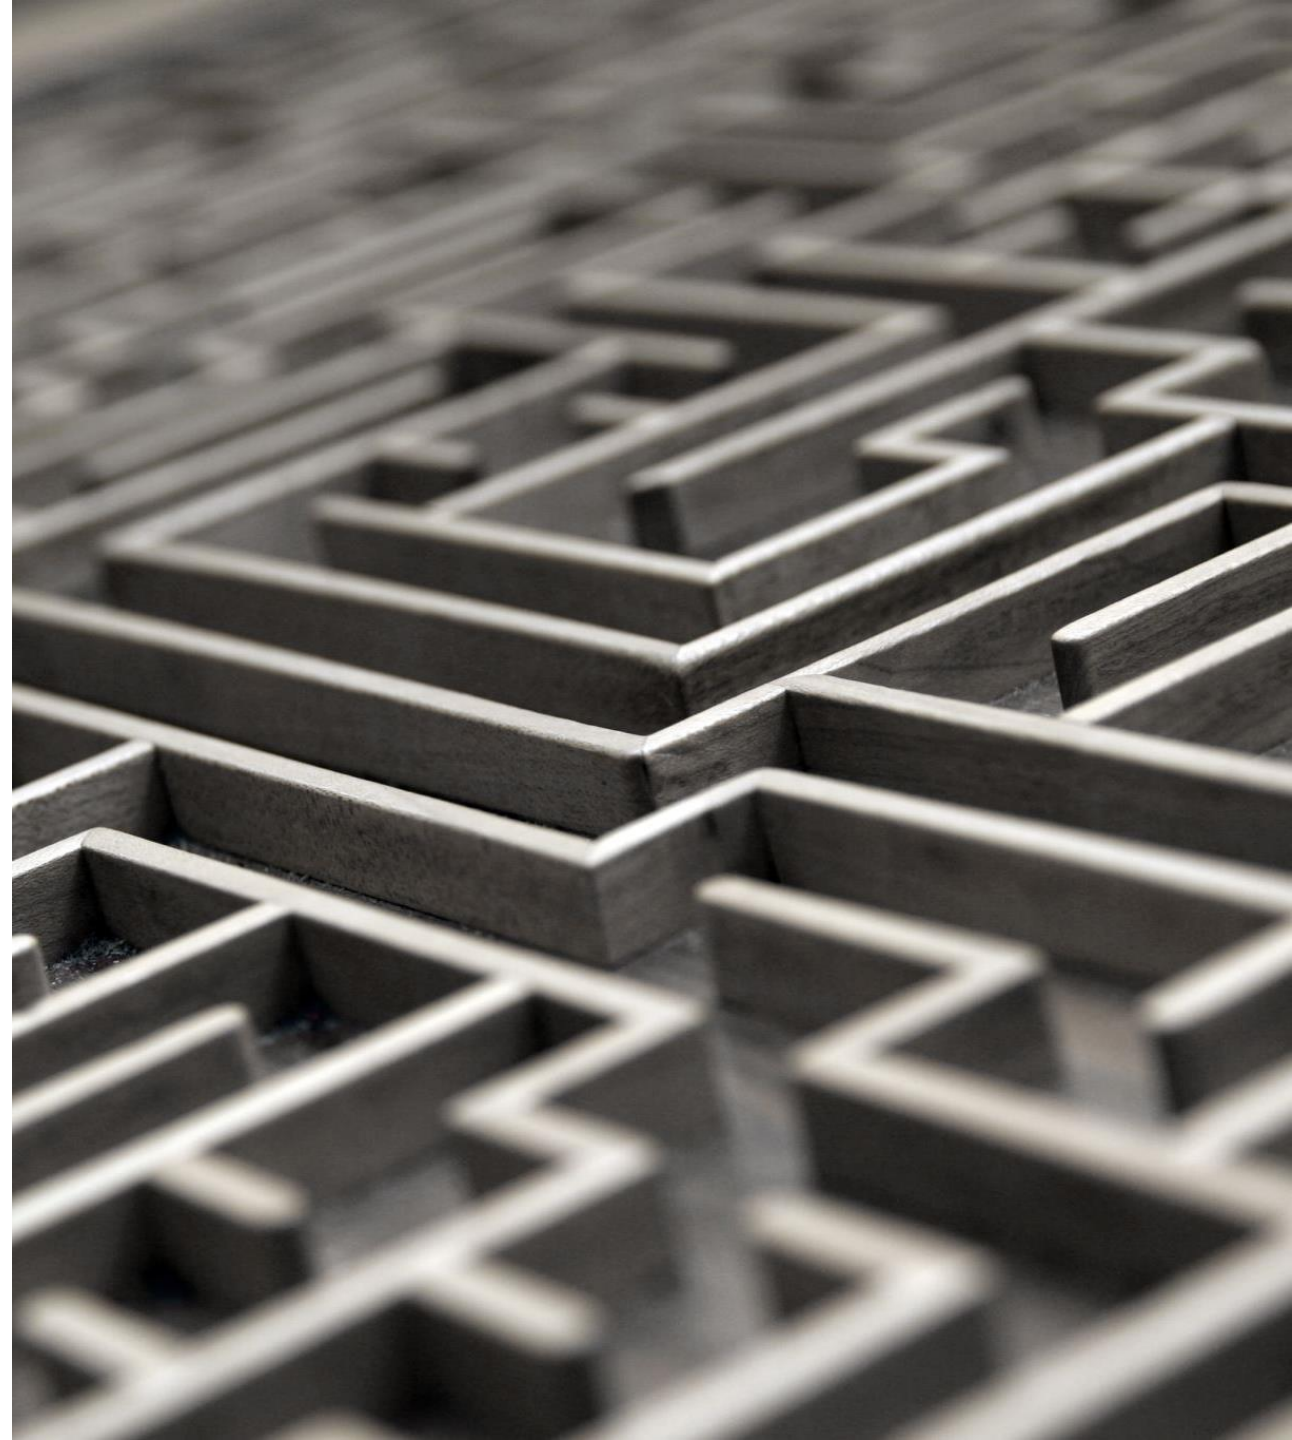

Traditional approach

Regional inconsistency

Data silos

Practitioner engagement

OUR CHALLENGE

Time and cost efficiency

Consistency and quality

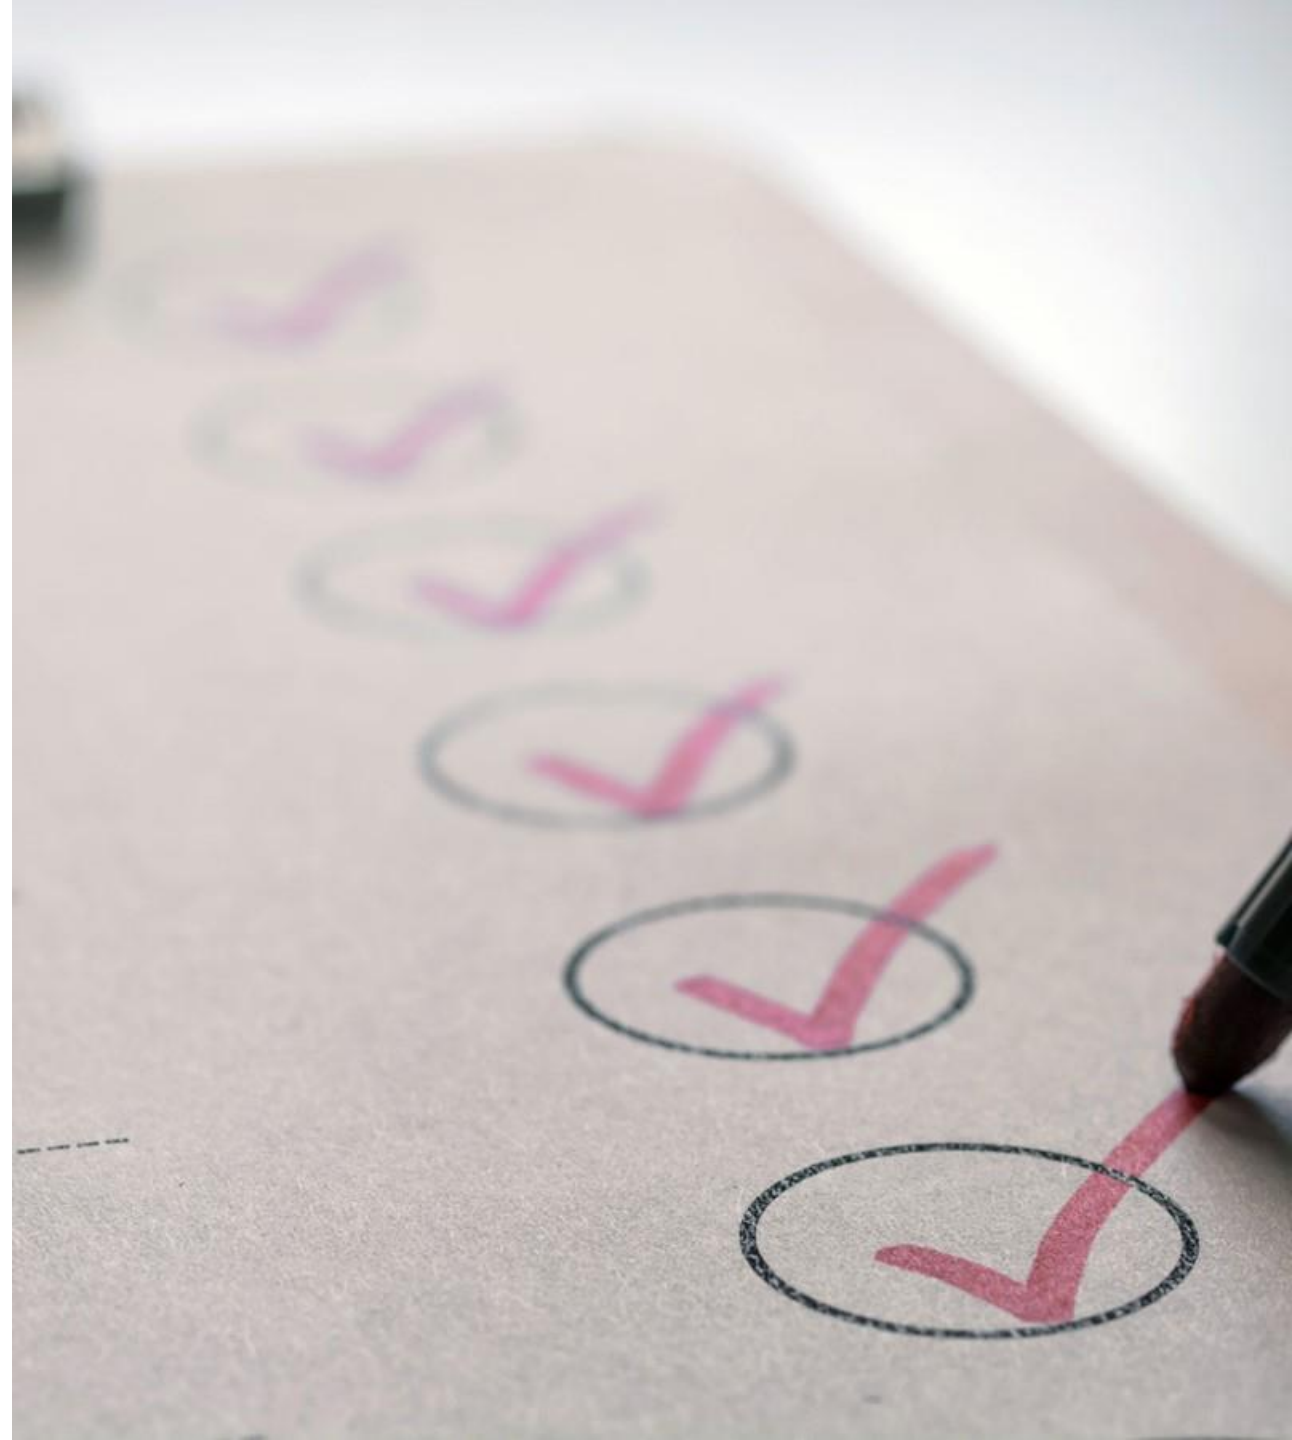

Maximising our data

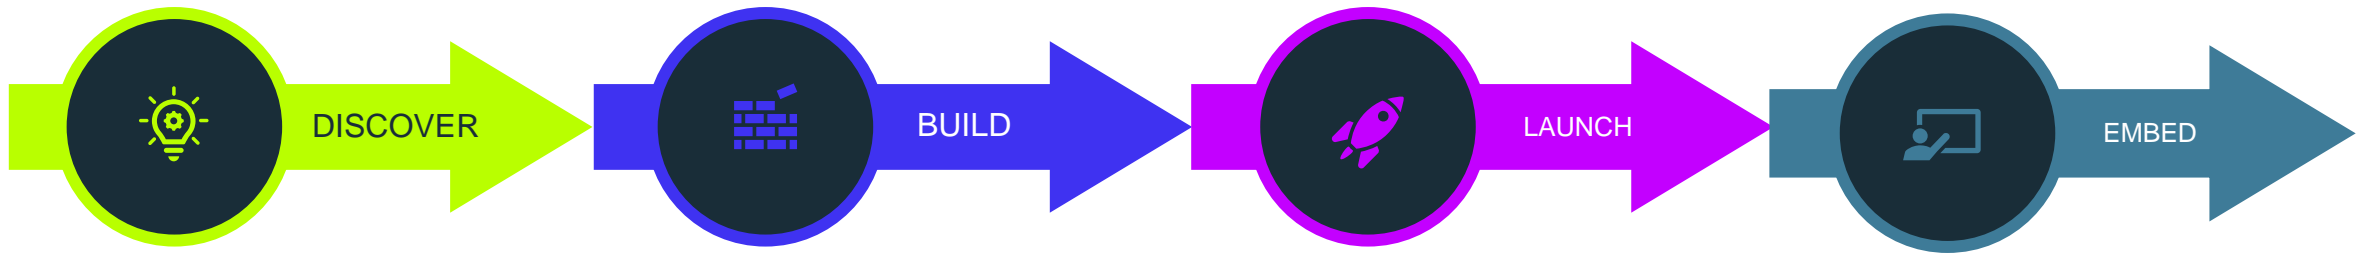

Innovation and development

Practitioner engagement and support

Adaptable

OUR AIMS

DISCOVER

Engage and consult

Develop concepts

Partner

Sponsorship and business case

BUILD

Plan, design and execute

Incremental build
