

AVEVAWORLD

ACCELERATE INDUSTRIAL INTELLIGENCE

MAY 20, 2026

Overview and roadmap

Presented by: Gregg Le Blanc, SVP, Ministry of Strategy & Prioritization

CONNECT

This presentation may include predictions, estimates, intentions, beliefs and other statements that are or may be construed as being forward-looking. While these forward-looking statements represent our current judgment on what the future holds, they are subject to risks and uncertainties that could result in actual outcomes differing materially from those projected in these statements. No statement contained herein constitutes a commitment by AVEVA to perform any particular action or to deliver any particular product or product features. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this presentation.

The Company shall not be obliged to disclose any revision to these forward-looking statements to reflect events or circumstances occurring after the date on which they are made or to reflect the occurrence of future events.

Solving the industrial intelligence gap

SILOED DATA

Struggling with the amount of poor and untrustworthy data

HIDDEN PATTERNS

Missing opportunities to optimize processes and prevent failures

COLLABORATION BARRIERS

Actioning data depends on manual or insecure processes

CONNECT

Unifying the industrial ecosystem with data, AI and deep domain expertise for greater sustainability and efficiency

TRUSTED INTELLIGENCE

Single source of truth
for proven applications

ACTIONABLE INSIGHT

Closing the loop for
real-world impact

UNIFIED EXPERIENCE

Hundreds of perspectives.
One shared reality.

EMPOWERED ECOSYSTEM

Accelerating collaboration
across the value chain

CONNECT

Data foundation for multi-site & system centralization

Data foundation for unlocking impactful outcomes

Data foundation for cross-functional initiatives

Data foundation for unifying the asset lifecycle

Design & Build

Operate

Optimize

PETROBRAS

150+ design engineering professionals working 5 simultaneous projects using the same data at the same time.

EDP RENEWABLES

Improved data access time from 12 hours to 15 minutes increasing profitability by adjusting energy prices more accurately.

LAMBERTI

Advanced toward golden batch performance with 5% net energy savings through reactor optimization.

CONNECT

CONNECT

Connectivity

Data collection tools and capabilities that transfer and sync data securely from edge, on-premises, and cloud sources.

Data management & visualization

Built-in functionality for storing, organizing, enriching, and displaying contextualized data through role-based visuals.

Collaboration

Sharing capabilities that facilitate cooperation and trusted data between both internal and external teams, securely.

AI & analytics

Assistants, agents, ML and data processing tools that expedite and amplify the analysis of data and insights.

Applications

Native applications, hybrid integrations and partner applications that leverage CONNECT's capabilities.

Industrial intelligence

CONNECT

Using CONNECT today

Craft role-based visualizations

Customize how you view and interact with your data

- Visualize insights between data sources and across data types quickly and easily
- From operators to executives, provide visualizations built for their specific needs and responsibilities
- Leverage designers and a library of configurable graphics and content
- Apply asset and time context to quickly switch between viewpoints

Secure private group data sharing

Communities extend your industrial data ecosystem

- Streamline internal and external data sharing
- Reduce time spent on manual data wrangling
- New opportunities sharing data with suppliers and partners
- Eliminates cost and risk associated with custom or manual processes
- Maintain control over what is shared, without exposing internal systems

AI Analytics | Perfect Centerline | Perfect Batch

Advanced Analytics

- Utilize machine learning and AI to analyze data and alert you to anomalies
- Provides corrective insights and quality recommendations
- Embed recommendations directly into operational workflows
- Reuse models and best practices to scale value across assets and sites
- Pre-built wizards, templates, and models ensure rapid deployment

Authoritative, contextualized IT/OT data sharing

Enterprise Data Integration - Databricks

- Standardized integration
- Doesn't require custom development or maintenance
- Maintain and augment contextualization of data across sites and sources
- Comprehensive view of IT and OT information
- Ensure accurate capture of updates and changes to the system of record
- Results and insights return to OT environments

Extending capabilities and use cases

Hybrid integrations leveraging CONNECT

- Out-of-the-box integrated
 - Trusted data-centric architecture
-
- Included as part of the Flex subscription program
 - Benefit from additional CONNECT-enabled enhancements
 - On-site users can be linked to CONNECT account

Extending capabilities and use cases

Native applications accessed through CONNECT

- Ready-to-use domain applications
 - Centralized industrial platform
-
- Included as part of the Flex subscription program
 - Benefit from additional CONNECT-enabled enhancements
 - Single sign-on (SSO) with your CONNECT account

AVEVA Unified Engineering

Data-centric 1D, 2D, 3D engineering and design tools

AVEVA Point Cloud Manager

Registering, processing and visualizing of 3D reality capture data

AVEVA Enterprise Resource Management

Materials, procurement, supply chain for capital projects and shipyards

AVEVA Simulation

Optimize equipment, processes and plants through simulation

AVEVA Unified Supply Chain

Oil and gas supply chain planning, scheduling, assay, and distribution

AVEVA Integration Studio

Infrastructure-as-a-service for rapid project creation in operations control

RIB CostX

All-in-one 3D/BIM and 2D take-off and estimating solution

AVEVA Unified Learning

Competency-based experiential operator training manager

AVEVA Edge Management

Provision and manage remote software on devices at the edge

AVEVA Production Accounting

Address unaccounted losses in refineries and petrochemicals

AVEVA Measurement Advisor

Verification of hydrocarbon flow measurement across entire fleet

AVEVA Asset Information Management

Validated multi-format 1D, 2D, 3D engineering data repository

CONNECT

Extending capabilities and use cases

Partner-built applications, integrations, and services that extend CONNECT

- Robust network of trusted partners
- Marketplace for partner solutions and services

-
- Technology partners
 - System integrators
 - Managed solution providers
 - OEMs and machine builders

Upcoming for CONNECT

CONNECT

CONNECT

Unified user experience

Industrial knowledge graph

New capabilities

Arriving Q1 2027
Limited *early access* begins July 2026

Unified user experience

Simplifying workflows and consolidating capabilities

- Deliver a more consistent, intuitive experience aligned with real use cases
- Clearer paths through key tasks
- Less time spent hunting for what you need
- Less effort managing information and more time applying it
- More consistency in how you interact with information across projects, sites, and teams

Industrial Knowledge Graph

Defining the network of digital relationships between your data

- Enhances decision-making, AI integration, and operational intelligence – the brain of a digital twin
- Maintains and strengthens industrial context
- Models physical and virtual objects from a variety of data sources
- Defined as a set of properties and relationships, composed of many types

Industrial Knowledge Graph

Navigating the network of digital relationships between your data

- Interactive visual navigation tool
- Context changes based on your selection, persists as you navigate
- View across perspectives: hierarchy, list, relationships, map, 2D, and 3D
- Navigate upstream and downstream
- Real time and historical data, events, metadata, and KPIs side by side
- Identify relevant information and content that impacts activities

Enhancing on-premises integrations

Maximize reuse of existing data structures

- Synchronized transfer of historical, asset, and event information
- Context preservation from on-premises to cloud
- More alignment between asset hierarchies and graph relationships
- Publish custom tables / events from PI System, MES and Production Management
- Planned Bulk upload of PI data
- Planned support for System Platform alarm and events

Enhancing on-premises integrations

Maximize reuse of existing content

Publish graphics from AVEVA System Platform

- Includes attributes and properties
- Simple and complex graphics

Publish AVEVA PI Vision displays to CONNECT

- Automatically remap datapoints
- Dedicated management in CONNECT

Visualize 3rd-party content

Make decisions with information in one place

- Embed third-party web content using a secure iFrame
- Combine visualizations with external reports and systems
- BI tools, ESG reports, maintenance systems
- Unify insights for full business perspective
- Reduce tool-switching and context loss

Intelligent data processing pipelines

Flows (formerly Crosser)

- Library of 800+ data sources and destinations to integrate
- Transform data with no code modules or low code connectors
- Process & run analytics with advanced logic out-of-the-box
- Trigger actions and smart automations
- Complement with your own code or ML/AI model
- Remotely manage from CONNECT, deploy in the cloud, on-premises, or at the edge

AI-assisted data mapping

Twin builder

- Intelligent mapping to a target digital twin ontology model from disparate sources, using agentic AI
- Match from all sources to a single view of properties and relationships
- AI agent provides suggested configuration – decline or accept based on user input
- Schedule mapping process to run on a recurring basis
- Preserves information lineage and ensures data governance so every downstream usage can be trusted

Authoritative, contextualized IT/OT data sharing

Enterprise Data Integration - Snowflake

- Standardized integration
- Doesn't require custom development or maintenance
- Maintain and augment contextualization of data across sites and sources
- Comprehensive view of IT and OT information
- Ensure accurate capture of updates and changes to the system of record
- Results and insights return to OT environments

Any BI & analytics tool supporting Open Delta Sharing

Enterprise Data Integration - BI reporting & analytics

- Governed industrial data via Open Delta Sharing
- Secure zero-copy architecture - no data duplication or pipelines
- One trusted source, multiple consumers across BI and analytics tools
- Accelerates analytics, AI, and decision-making workflows
- Compatible with Power BI, Tableau, Qlik, Excel, SAP, Python
- New, basic stream calculations in CONNECT

Expanding agentic and generative AI use cases

Purpose-built and standardized integration framework

- Prebuilt agentic use cases across design, build, operate and optimize functions
- Knowledge graph and industrial ontology enrichment for Industrial AI Assistant
- 3rd party MCP, agent, and LLM ecosystem enablement
- Enhanced platform search using ai-assisted intent referencing

Industrial intelligence through trusted data

Industrial intelligence through the digital twin

Industrial intelligence through CONNECT

Upcoming CONNECT sessions

- **Methanex:** Manufacturing AI Agent - From Data Access to Data Delivery
Today, 4:15p - 4:45p , Amber 3
- **Power and Water Corporation:** A Move to PI Data Infrastructure – Exploring PI in the Sky
Today, 4:15p – 4:45p, Amber 4
- **Calcamite, 4Sight OT:** Building a Sustainable Water Future for Developing Nations
Today, 5:00p – 5:30p, Amber 1
- **Agnico Eagle:** From Analytics to Enterprise Intelligence: How Agnico Eagle Scaled CONNECT Across Mining Operations
Tomorrow, 10:30a – 11:00a, Amber 4
- **Architecting Digital Twins on CONNECT: AI-Assisted Twin Building at Scale**
Today, 3:30p – 4:00p, Amber 2
- **Delivering Intelligent Data Integrations, Edge DataOps and Edge AI with Flows on CONNECT**
Today, 4:15p – 4:45p, Amber 2
- **Visualizing Data with CONNECT: Industrial Awareness at Scale**
Today, 5:00p – 5:30p, Amber 2
- **From Data to Decisions: Advanced Industrial Analytics and Machine Learning with CONNECT**
Tomorrow, 09:45 – 10:15, Brown 2
- **AVEVA AI: Empowering Decisions for the Next Industrial Era**
Tomorrow, 10:30 – 11:00, Brown 2
- **Plugging In: Integrating CONNECT with the Enterprise Data Stack**
Tomorrow, 11:15 – 11:45, Brown 2
