

AVEVA PI WORLD

Transform your operations

Enabling new opportunities for collaborative transformation

Presented By:

Darren Fraser, Product Director, AVEVA Insight
Landry Khounlavong, Strategic Product Manager

AVEVA

AGENDA

Transform your operations

- ❑ Bring AVEVA's cloud vision and strategy for operations into focus by looking at the near future
- ❑ Focus on how AVEVA enables you to use data to better manage your operations and industrial equipment
- ❑ Explain what is available today
- ❑ Take an early look at what is in development

Today, not only are industrial operations remote

You are now remote!

Yet the pressure on operations to deliver is accelerating

... and previous challenges remain **along with new ones**

- ✓ Industrial equipment must continue to produce
- ✓ Unplanned downtime still needs to be avoided
- ✓ Equipment failures still need to be resolved quickly
- ✓ Visibility into all your equipment is still needed for safe, efficient, and productive operations

AVEVA is making it
easy to leverage
industrial data at scale
to improve operational
performance
and asset reliability

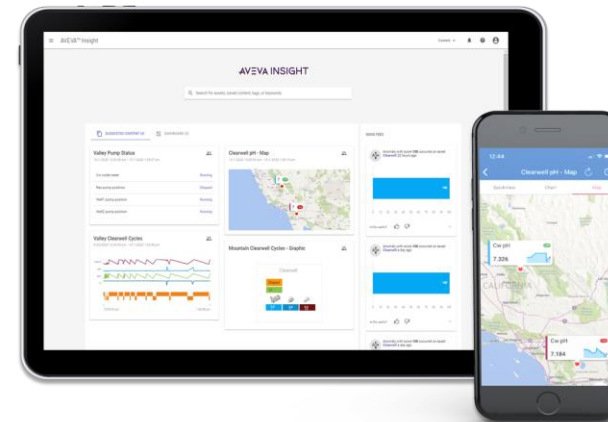

OSIsoft Cloud Services is a secure and easily-scaled operations data platform that provides reliable data access to any user in any location.

- Industrial data platform automates collection of complex, sequential and time-series operations data
- Fully-managed cloud service is quick to deploy, with no coding, maintenance or technology integration
- Combine edge, plant and sensor data in one platform
- Securely share real-time data with internal stakeholders and ecosystem partners

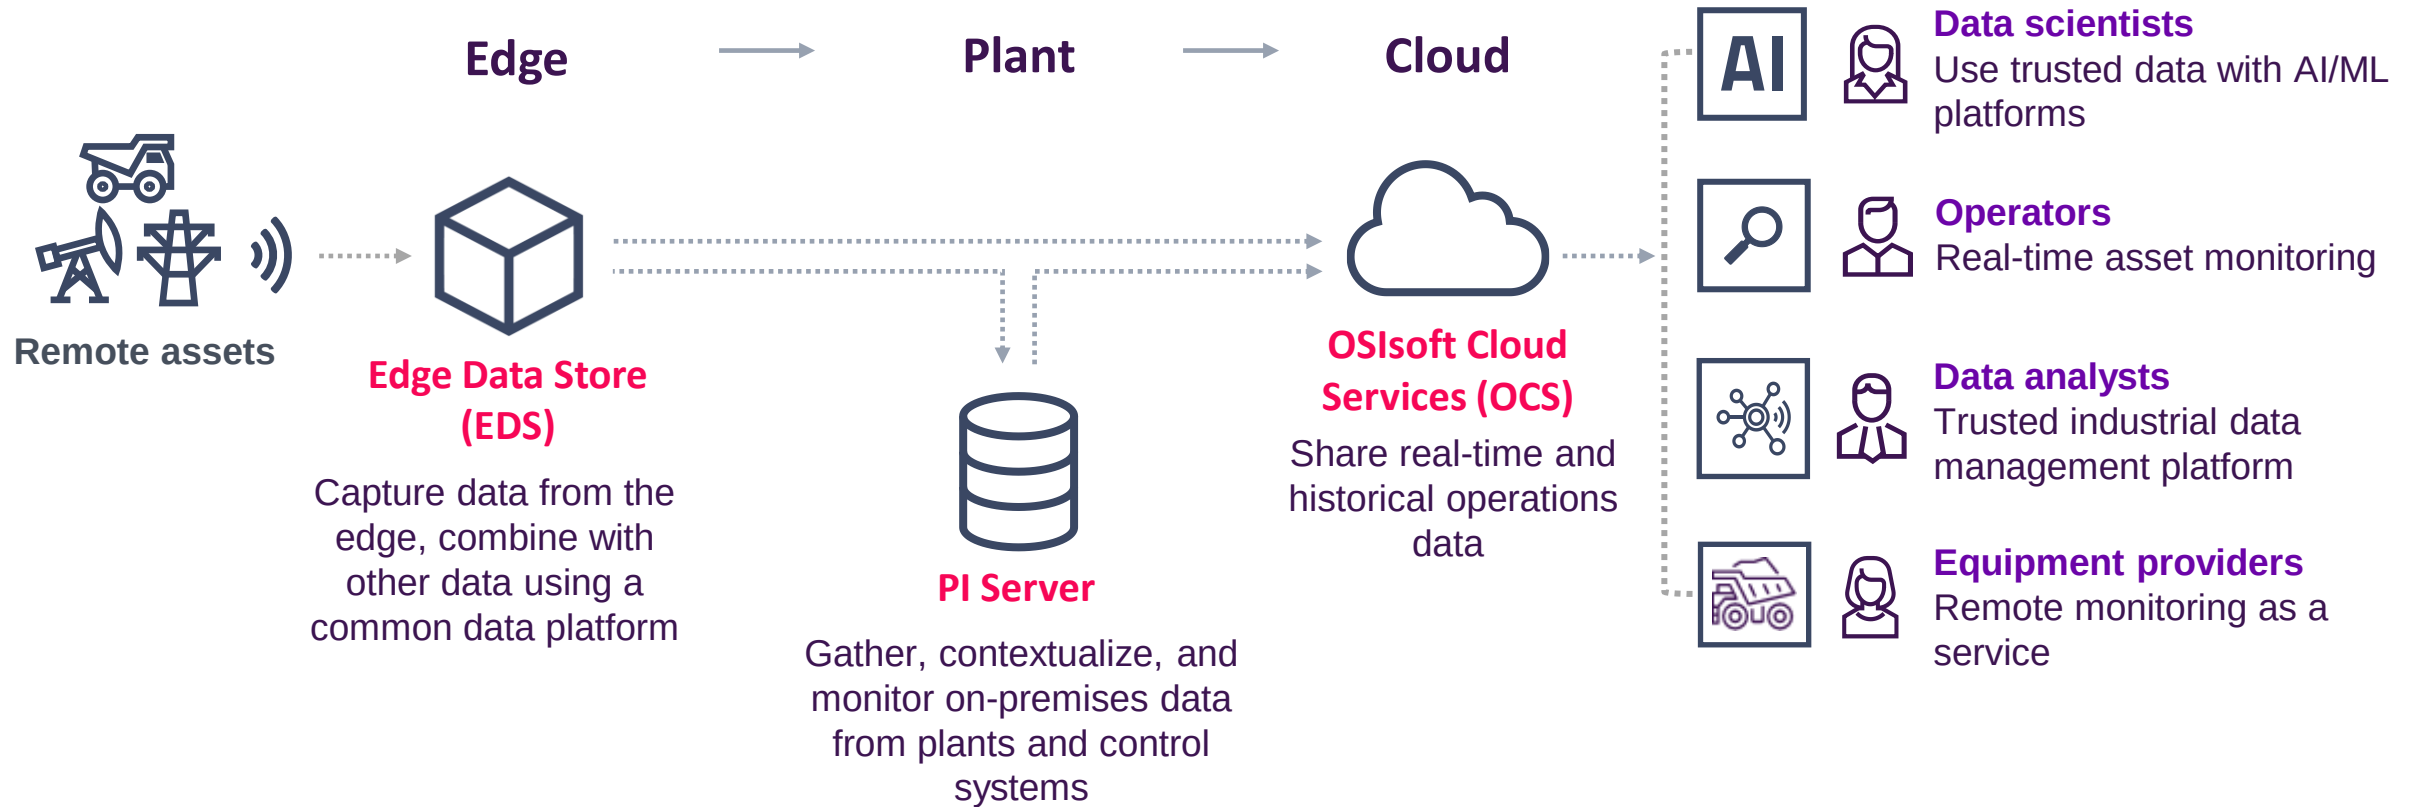

OSIsoft Cloud Services (OCS) is becoming AVEVA™ Data Hub

AVEVA™ Insight provides information when and where you need it, so you and your teams, can better manage your assets and improve performance.

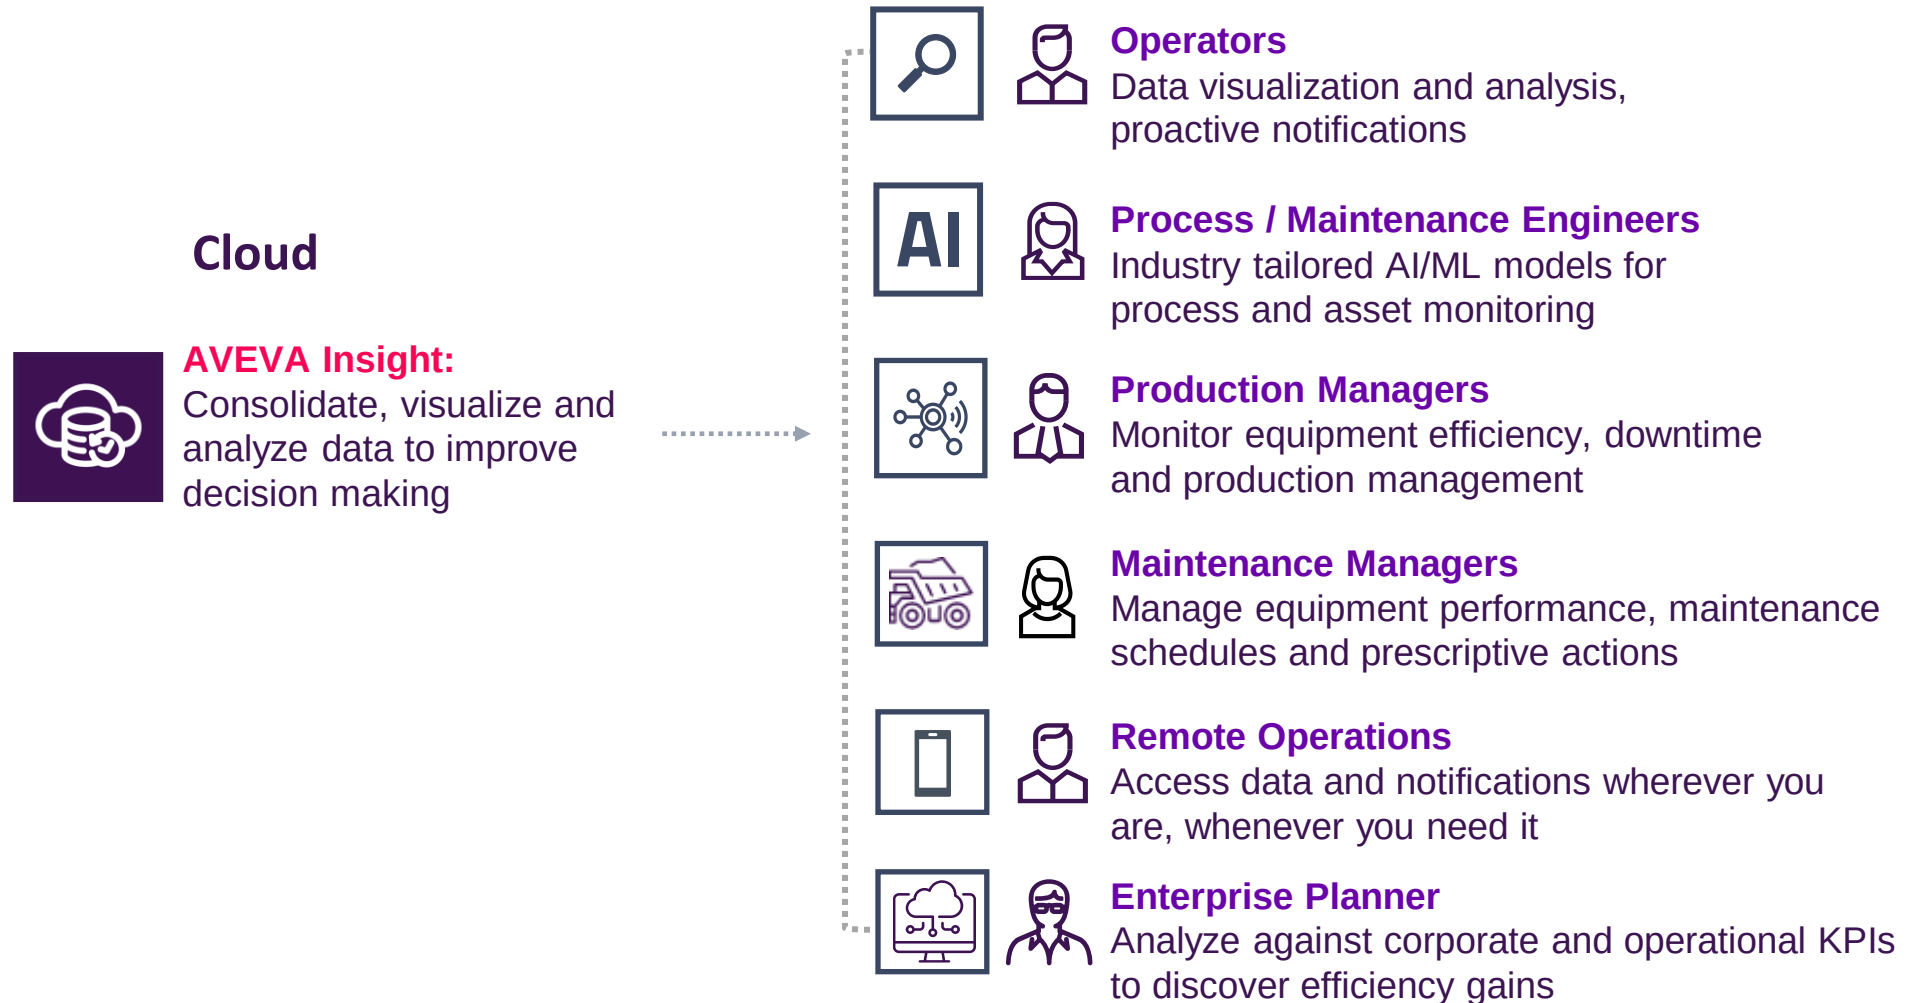

- Gain asset performance insights with artificial intelligence and powerful analytics
- Visualization and data analysis tools to understand equipment performance
- Remote monitoring and access anywhere, at any time
- Quickly, easily and with minimum fuss

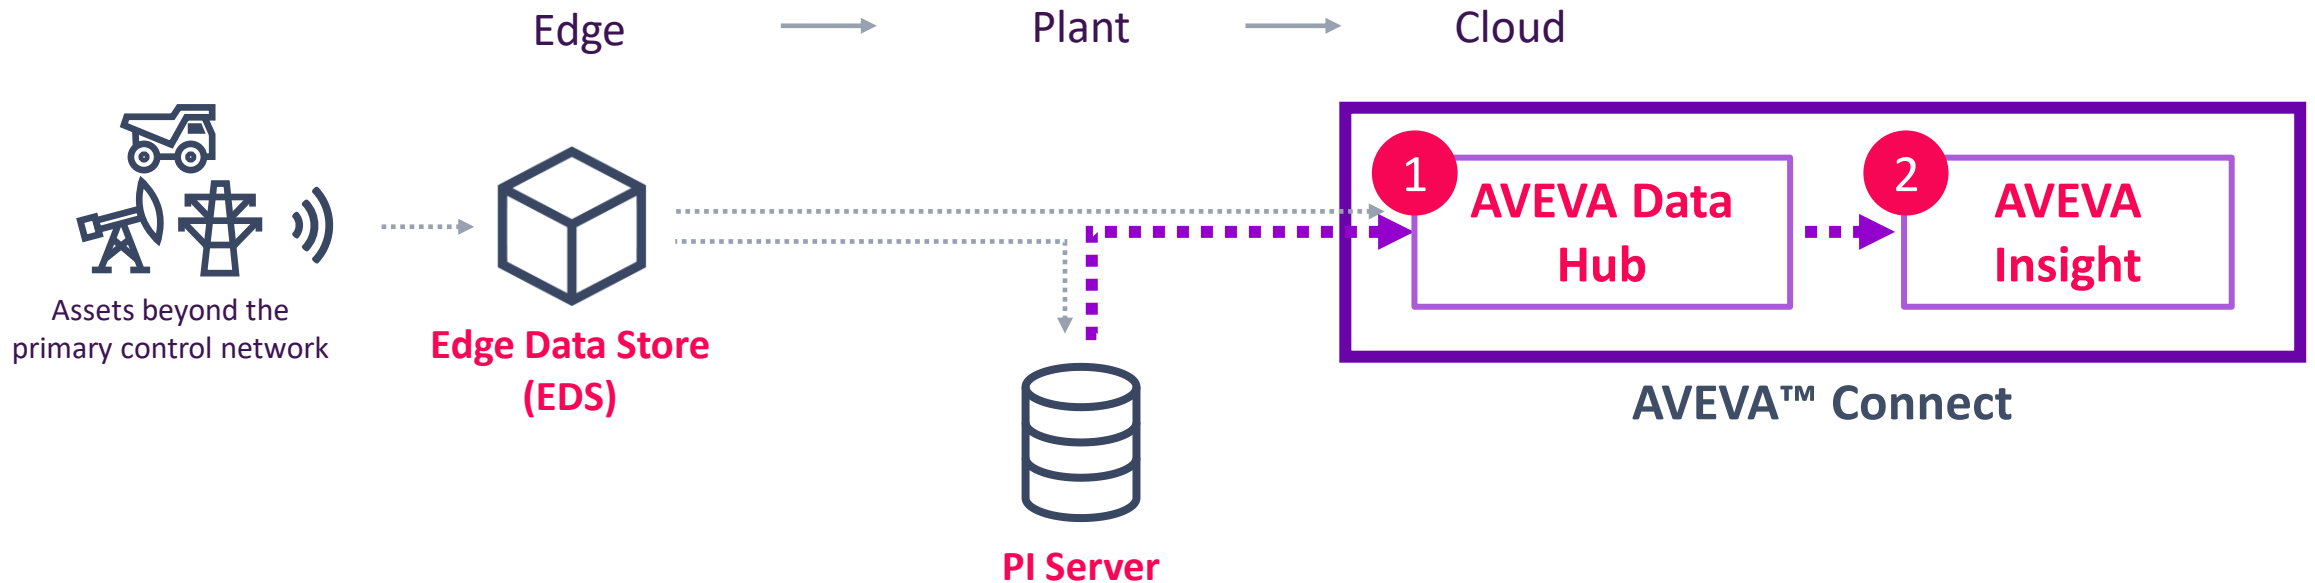

Cloud data platform built for industrial operations

Operations and asset management platform

Detect anomalies, analyze data, and make decisions no matter where your equipment lives

Product integration in progress

- 1 Self-service deployment of a data platform with easy-to-configure data collection
- 2 Visualization, analytics, and seamless remote access to centralized industrial data

ABOUT AVEVA

AVEVA, a global leader in industrial software, drives digital transformation for industrial organizations managing complex operational processes. Through Performance Intelligence, AVEVA connects the power of information and artificial intelligence (AI) with human insight, to enable faster and more precise decision making, helping industries to boost operational delivery and sustainability. Our cloud-enabled data platform, combined with software that spans design, engineering and operations, asset performance, monitoring and control solutions delivers proven business value and outcomes to over 20,000 customers worldwide, supported by the largest industrial software ecosystem, including 5,500 partners and 5,700 certified developers. AVEVA is headquartered in Cambridge, UK, with over 6,000 employees at 90 locations in more than 40 countries. For more details visit: www.aveva.com
