## Portfolio commentary

Equity markets continued to advance and bond yields were little changed over the quarter masking a fair degree of turbulence as investors considered the prospects for higher inflation and the need for very loose policy to tighten.

Bond yields temporarily moved higher then retraced as central banks maintained their supportive stance even as inflation looked to move ahead of an anticipated short-term inflation spike.

Investment Grade and High Yield spreads, already very thin, have tightened further. Equity markets have seen a resurgence from the quality and growth areas that had underperformed relative to value and cyclical during the first quarter.

We introduced two new funds over the quarter as we consolidated areas of the portfolio and topped up Property from Fixed Interest. The Lindsell Train Global Equity purchase

# Quarterly Report Q2 2021

was funded through the combined sale of Lindsell Train UK Equity and Japanese Equity funds, we see this as more a 'best ideas' approach from the well-regarded fund manager. We also reintroduced the Miton UK Multi Cap Income fund to the portfolio.

Private Equity is an area we have been looking at for some time and last quarter we had the opportunity to increase our exposure, adding to the Chrysalis Trust, with investments in HG Capital and the Schiehallion trust run by Baillie Gifford. The three trusts have little overlap and should benefit from long term high growth prospects that come with buying smaller unlisted companies.

Following the investment in Supermarket Income REIT (real estate investment trust) in the first quarter we have added to the REIT exposure through purchase of four additional REITs each with a greater specialised sectoral focus on industrials,

social housing, and healthcare. We feel this approach is the best way to invest in commercial property where there are fewer structural headwinds from liquidity and potential regulatory disruption.

Equity has been the headline performer over what has been a pleasing quarter for investment returns across the portfolio. The UK Dynamic and Global Established portfolios have led the equity pack which has dominated the contribution to overall returns.

At the fund level, Chrysalis has had a fantastic quarter benefitting from stellar performance from its highly concentrated portfolio of companies. The Chelverton UK Growth and Miton UK Value funds are once again in the top five contributors as UK small cap and value strategies benefited from better prospects for growth and improving sentiment to UK equities in general. Baillie Gifford American returned over 20% more than recovering losses suffered in the first quarter.
