

Vaisala Health and Safety Policy

Vaisala is committed to protecting the health and safety of our employees, contractors, customers, visitors and the communities where we operate with a goal of zero injuries and occupational diseases. We operate an ISO 45001 certified health and safety management system to identify hazards, manage risks, and drive continual improvement. We set measurable health and safety objectives and monitor progress regularly.

Healthy and safe work environment

We provide healthy and safe working conditions for all employees and those working on our behalf. We act to prevent work-related accidents, injuries, diseases, and incidents, including risks related to physical and mental health. We promote employee wellbeing, support a healthy work-life balance, and encourage initiatives that enhance overall wellbeing.

Compliance and health and safety management

We comply with applicable health and safety laws, regulations, and other requirements we adopt or endorse. We apply consistent health and safety management practices across our global operations, supply chain, and activities, including contractors and third parties working under our control.

Collaboration and communication

We consult and collaborate with employees and their representatives on all health and safety matters. We promote health and safety awareness and provide appropriate training for our employees, and we communicate our health and safety performance openly to stakeholders in our annual Sustainability Statement.

Continual improvement

We establish health and safety objectives and track our progress toward them. We take preventive and corrective actions as needed to continually strengthen our health and safety performance.

Kai Öistämö
President & CEO, Vaisala
