After 8 weeks of implementation

95%

PAX Tools helped them gain confidence to work with children

Here's what participants are saying about PAX Tools

99%

left the training ready to implement immediately

"This was an amazing training. It was very helpful and engaging, and I loved the examples and scenarios that were used to make this easier to understand and digest... I am so excited to get started!"

"The trainer did an amazing job at engaging us for the whole day in a virtual environment. She had clear knowledge about the tools and the theories, as well as a lot of practical experience she could draw on to connect us with..."

9 out of 10

report less conflict within their setting
