Sudden cardiac arrest events can vary greatly. RCX SPORTS FOUNDATION staff, Coaches and Cardiac Emergency Response Team (CERT – defined in Appendix A) members must be prepared to perform the duties outlined below. Immediate action is crucial in order to successfully respond to a cardiac emergency. Consideration should be given to obtaining on-site ambulance coverage for high-risk youth sporting events. The facility should also identify the closest appropriate medical facility that is equipped in advanced cardiac care.

Follow these steps in responding to a suspected cardiac emergency:

- a) **Recognize the following signs of sudden cardiac arrest and take action in the event of one or more of the following**
  - The person is not moving, or is unresponsive, or appears to be unconscious.
  - The person is not breathing normally (has irregular breaths, gasping or gurgling, or is not breathing at all).
  - The person appears to be having a seizure or is experiencing convulsion-like activity. (Cardiac arrest victims commonly appear to be having convulsions).
  - Note: If the person received a blunt blow to the chest, this can cause cardiac arrest, a condition called commotio cordis. The person may have the signs of cardiac arrest described above and is treated the same.
  
- b) **Facilitate immediate access to professional medical help**
  - Call 9-1-1 as soon as you suspect a sudden cardiac arrest. Provide the address, cross streets, and patient condition. Remain on the phone with 9-1-1. (Bring your mobile phone to the patient's side, if possible.) Give the exact location and provide the recommended route for ambulances to enter and exit. Facilitate access to the victim for arriving Emergency Medical Service (EMS) personnel.
  - Immediately contact the members of the Cardiac Emergency Response Team.
    - Give the exact location of the emergency within the facility or athletic field complex. Assign someone to wait for and flag down EMS responders and escort them to the exact location of the patient.
  - If you are a CERT member, proceed immediately to the scene of the cardiac emergency.

# RCX sports FOUNDATION

LET'S PLAY

- The closest team member should retrieve the automated external defibrillator (AED) in route to the scene
- Acquire AED supplies such as scissors, a razor and a towel and consider an extra set of AED pads.

## c) Start CPR

- Begin continuous chest compressions and have someone retrieve the AED.
- Here's how:
  - Press hard and fast in center of chest. Goal is 100 compressions per minute. (Faster than once per second, but slower than twice per second.)
  - Use 2 hands: The heel of one hand and the other hand on top (or one hand for children under 8 years old), pushing to a depth of 2 inches (or 1/3<sup>rd</sup> the depth of the chest for children under 8 years old.
  - Follow the 9-1-1 dispatcher's instructions, if provided.

## d) Use the nearest AED

- When the AED is brought to the patient's side, press the power-on button, and attach the pads to the patient as shown in the diagram on the pads. Then follow the AED's audio and visual instructions. If the person needs to be shocked to restore a normal heart rhythm, the AED will deliver one or more shocks.
  - Note: The AED will only deliver shocks if needed; if no shock is needed, no shock will be delivered.
- Continue CPR until the patient is responsive or a professional responder arrives and takes over.

## e) Transition care to EMS

- Transition care to EMS upon arrival so that they can provide advanced life support.

## f) Action to be taken by RCX Sports Administrative Staff

- Confirm the exact location and the condition of the patient.
- Activate the Cardiac Emergency Response Team and give the exact location if not already done.

LET'S PLAY

- Confirm that the Cardiac Emergency Response Team has responded.
- Confirm that 9-1-1 was called. If not, call 9-1-1 immediately.
- Assign a staff member to direct EMS to the scene.
- Perform "Crowd Control" – directing others away from the scene.
- Notify other staff: facility administrators, athletic trainer, etc.
- Ensure that medical coverage continues to be provided at the athletic event if on-site medical staff accompanies the victim to the hospital.
- Copy the patient's emergency information for EMS.
- Notify the patient's emergency contact (parent/guardian, spouse, etc.).

## APPENDIX A

### RCX SPORTS FOUNDATION CARDIAC EMERGENCY RESPONSE TEAM

- (a) The Cardiac Emergency Response Team shall be composed of individuals (administrators, RCX Sports staff members) who have current CPR/AED certification. It also includes an organization member who can call 9-1-1 and direct EMS to the location of the SCA.
- (b) One of the members shall be designated as the Cardiac Emergency Response Team Coordinator.
- (c) All members of the Cardiac Emergency Response Team shall receive and maintain nationally recognized training, which includes a certification card with an expiration date of not more than 2 years.
- (d) As many other staff members as reasonably practicable shall receive training.
