

# PEDESTRIAN RAIL OPTIONS

NOT TO SCALE

NOTE: Each railing and retaining wall design is different based upon rail height, post spacing, rail proximity to the retaining wall, etc. Therefore, each railing requires site specific engineering design. This detail shows suggestions on possible options for railings near Novum Wall retaining walls. It is the design engineer's responsibility to fully design and detail the connection of the rail to a foundation and assure acceptable resistance to the applied forces acting on the railing.

**SLEEVE OPTION**

**MOMENT SLAB OPTION**

This drawing is for reference only. Determination of the suitability and/or manner of use of any details contained in this document is the sole responsibility of the design engineer of record. Final project designs, including all construction details, internal and external stability, and drainage, shall be prepared by a licensed professional engineer using the actual conditions of the proposed site.
