

HARVEY
WINDOWS + DOORS

VINYL PRODUCTS GUIDE

PREMIUM VINYL WINDOWS AND DOORS

Harvey vinyl windows and patio doors have been engineered to withstand the elements and look good while doing it. Features like our premier block and tackle balance system and dust cover, corrosion-resistant zinc plated alloy pivot bars and terminal housing, extrusion injected weather seals, and durable die-cast metal locks provide a lifetime of all-weather protection plus smooth opening and closing.

VINYL & MECHANICAL PARTS

Clear Confidence®

LIFETIME

WARRANTY

20 YEARS GLASS COVERAGE

20 YEARS TRANSFERABILITY

WITH HARVEY, YOU GET PEACE OF MIND, STANDARD.

For over 60 years, we've built our reputation on the outstanding craftsmanship of our products and our world class customer service. You can rest easy knowing that most Harvey windows are backed by our Clear Confidence Warranty and that our commitment lasts a lifetime.

Warranties provided by Harvey are for product parts and mechanisms; they do not cover damages resulting from improper installation nor do they cover labor charges. Exceptions apply to discontinued and modified products

VINYL WINDOW FEATURES

AT A GLANCE

- ▶ Harvey uses premium vinyl that's strong, resistant to insects and corrosion, and is effective at controlling noise.
- ▶ Harvey vinyl windows will never need painting and their heavy duty hardware lasts a lifetime.
- ▶ Most windows are available with FlexScreens, which spring into the screen track, allowing for easy installation, removal, and storage.
- ▶ Customization is endless with grid, glass, paint, and hardware options.

DURABLE. EFFICIENT. HIGH PERFORMING.

Harvey windows are built strong, and they're engineered with up to twice as much PVC as competitors, along with more chambers and thicker walls for durability. The extra PVC is inside the frame, so it's not bulky, and they will not expand or contract like other windows with less PVC.

Energy efficient Harvey products are available in several glass options from insulated glass with Low-E coatings and Argon gas, to high performance triple glazing, so that you can select the package that meets your energy goals and budget needs.

Harvey windows are more airtight than the industry standard. Because less air passes through Harvey windows, your heating/cooling systems will go on less frequently, helping you save on climate control costs and system wear and tear. Corners are fusion welded, adding structural integrity and sealing out air better than other windows that use screws and sealant.

Shown with Balance Cover
Removed

Harvey utilizes a premier Block and Tackle Balance (hidden behind a white balance cover) that's more efficient than metal balances such as Constant Force that others use. Lifting and closing of Harvey windows will be smooth and quiet for many years. Cheaper balances used by others can be difficult and noisy to operate.

ENERGY EFFICIENT DIFFERENCE

AIR INFILTRATION 96% BETTER THAN INDUSTRY STANDARD

Most Harvey Vinyl Windows have AI ratings of .01 CFM/SF depending on size and operating style.

Lesser quality windows allow more air in.

Quality Harvey windows let less air in.

AIR INFILTRATION

Lower quality vinyl and composite windows aren't engineered to the same standards as Harvey windows, which have advanced integrated weatherseals and sash-locking technology. When these features are lacking, it leads to excessive air passing through the gaps where the sash meets the frame or around the perimeter of a closed window, otherwise known as a high rate of air infiltration (AI), a value that is determined through independent, 3rd party testing.

The American Architectural Manufacturers Association (AAMA) mandates a maximum air exchange rate of 0.30 cfm/sf at 1.57 psf (25 mph).

Harvey vinyl windows have air infiltration ratings ranging from .01-.07 cfm/sf, depending on size and operating style.

Why? Because Harvey windows were born in the Northeast where keeping out the cold is a priority. And, in the summer homeowners benefit by keeping cooler air in. If you choose a window with a higher AI, the more drafty a room will be, and the more energy will be used from frequent heating and cooling cycles, while a low AI rate can help homeowners save money and prevents additional wear and tear on their HVAC systems.

*Assuming a 3'x5' vinyl double hung in a 12'x12'x9' room (1,296ft³)

**Traditional High-Performance Vinyl Double Hungs with an average AI range of 0.11-0.21CFM

SO HOW MUCH AIR IS THAT?

The more air is leaking from a window, the more frequently an HVAC system will have to replace the air in a room. It helps to visualize air leakage in a unit that's familiar, like gallons and ounces of water.

.30 CFM/FT²
AAMA Minimum

At this rate, the air in a 12'x12' room* will get replaced:
Once every 4.8hrs.

.12 CFM/FT²
Mid-Quality Vinyl Window**

At this rate, the air in a 12'x12' room* will get replaced:
Once every 12hrs.

.01 CFM/FT²

Harvey Vinyl Double Hung Windows

At this rate, the air in a 12'x12' room* will get

GLASS OPTIONS

Harvey gives you the flexibility to choose the performance package that fits your project with several glass options that meet ENERGY STAR requirements as well as additional energy efficient packages.

HOW OUR GLASS WORKS

- 1 A special coating, known as Low-E, is applied to our glass to reduce temperature transference by reflecting infrared light. Low-E is a non-toxic, environmentally friendly way to enhance a window's energy efficiency.

Low-E coatings can be applied to the various sides of the glass panes. Our highest performing glass features a roomside Low-E coating, found on the inner most glass side with an additional layer of Low-E applied to the exterior glass pane.

- 2 Colorless, odorless, non-toxic Argon gas fills the space between the glass. Because it's heavier than air, it provides better insulation than alone, increasing the thermal performance of the glass.

- 3 The areas where the edges of the glass meet the frame are most vulnerable to temperature transference, so a warm edge spacer is used to insulate where the glass seals to the window frame, reducing heat transfer through the window.

SUNGAIN PLUS
Best for Northern Climates

SunGain Plus with roomside Low-E, is engineered to have a high Solar Heat Gain Coefficient so more of the sun's rays penetrate the glass to offset heating, providing superior performance in northern climates.

SunGain Plus also has our highest Visible Transmittance (VT) rating which means it

SUNSHIELD PLUS | SUNSHIELD
Best for South/South-Central Climates

SunShield Plus with roomside Low-E and SunShield work by shielding the home from solar heat and ultraviolet rays that can fade furniture and carpet.

Tinting is minimal with virtually no exterior reflectance, keeping the view unobstructed.

THERMALOCK RS
Best for North-Central Climates

ThermaLock RS with roomside Low-E helps to keep interior temperatures consistent by reflecting heated or cooled air back inside, while still allowing ample sunlight in.

THERMALOCK 3X
Triple Glazed

ThermaLock 3X with roomside Low-E is our premium ENERGY STAR option. It kicks performance up a notch with three Low-E coated panes of glass, (including roomside), making it the best choice to significantly reduce energy consumption in climates where both cooling and heating costs are a concern.

NFRC values for ENERGY STAR 7.0 rated and other energy efficient glass packages can be found in the Thermal Specifications chart in the reference section of this guide.

Full window configuration (i.e.: size, grids, operating style and other options) affect unit NFRC values and therefore ENERGY STAR zone compliance. Products are tested for performance regularly and are subject to change.

CUSTOMIZATION OPTIONS

GRIDS

Both 5/8" and 1" grids in either contoured or flat are available for most products. Grids can also be painted.

See product pages for grid options per window/doors style.

CONFIGURATIONS

Fully customize any grid design. Choose Colonial, Prairie, or other unique styles like Tudor or Gothic.

SASH ORIENTATION

Even sashes are nice, but you can also select Oriel, Cottage, or a custom orientation.

SIMULATED DIVIDED LITES (SDL)

For a dramatic and upscale look, choose the SDL grid system which utilizes a pewter in-glass grid with grids applied on both the interior and exterior. Available for most vinyl windows.

EXTERIOR APPLIED

Exterior applied grids provide a more defined architectural style on the exterior, with the ease of grids between glass on the inside. Available for most vinyl windows.

GRIDS BETWEEN GLASS (GBG)

Color-matched contoured grids are positioned between the glass, allowing for easy cleaning. Available for most vinyl windows.

SCREENS

FLEXSCREEN FRAME

Experience the ultimate in window screen innovation with FlexScreen. This discreet frame effortlessly disappears into your window, creating an unobstructed view. Crafted from robust, break-resistant steel with a scratch-resistant powder coating, FlexScreen is built to last. It springs into place, making installation a breeze. Combine with VIEWS mesh for the clearest view.

- Nearly indestructible
- No color matching necessary
- Full view
- No hardware
- Effortless installation and removal

EXTRUDED ALUMINUM FRAME

Harvey aluminum frames are tough, sturdy and relatively easy to remove and install, with hidden metal corners that won't become brittle like the exposed plastic corners found on lower quality screens.

MESH

VIEWS

Standard Screen

VIEWS

Upgrade to Virtually Invisible Screens, for a brighter view, 25% better airflow, and maximum protection against small insects.

FIBERGLASS

A popular choice for its durability, fiberglass is flexible and does not crease, dent, or unravel.

Screens come in half and full sizes. See product pages for screen options per window/doors style.

PAINT AND HARDWARE FINISHES

EXTERIOR VINYL FINISHES

In addition to White or Almond extruded vinyl windows and patio doors, Harvey offers a standard and custom exterior paint spectrum backed by a 10-year limited warranty against cracking, peeling or discoloration.

The water-based coatings contain special pigments to withstand temperature fluctuations while retaining vibrant color. With no toxic hardeners, the finish is durable while exceeding environmental and performance standards.

*Almond vinyl and hardware not available on Tribute window. Almond vinyl cannot be painted.
Hardware finishes shown are for windows only. See pg. 37 for hardware options available for patio doors.

VINYL WINDOWS

Harvey vinyl windows are engineered to withstand the elements and deliver unmatched durability with minimal maintenance. Features like our premier block and tackle balance system, sturdy die-cast metal locks, and advanced weather stripping provide a lifetime smooth operation and all-weather protection. In addition to our various operating styles, you can fully customize your home's windows with interior and exterior colors, hardware finishes, grid styles, as well as with ENERGY STAR performance options.

TRIBUTE DOUBLE HUNG WINDOW

The Harvey Tribute double hung provides superior energy efficiency and stunning good looks. The Tribute is fusion welded with a contoured sash and beveled edges to emulate the traditional look of a wood window. Harvey's revolutionary dual action lock/tilt latch combo gives the Tribute clean lines, with no exposed tilt latches to block your view.

LOCK

Tribute comes with double low profile sash locks, in three finishes, to complement its sleek design. Dual action means you can lock and tilt open the window with a flip of the thumb. Add matching applied lift handle for an upgraded appearance.

MORE OPTIONS & FEATURES

- Grids come in 5/8" and 1" sizes
- Custom grid configurations plus oriel & cottage sash options
- Full and half size screens
- Sash/glazing bead contours and Simulated Divided Lite grids could help meet historic requirements when remodeling
- Both sashes tilt in for cleaning; premium ventilation limit latches keep top or bottom sash partially open

CLASSIC DOUBLE HUNG WINDOW

Our most popular window, the Classic offers a variety of color, grid and hardware options to match the style of any home. ENERGY STAR packages and advanced performance features makes Classic an excellent choice for a hardworking, dependable, yet customizable window.

LOCK

Classic comes with a low profile cam lock. This die-cast metal lock is durable and does not compromise on style with four colors available: white, almond, oil-rubbed bronze and brushed nickel. Built to last and withstand wear and use, yet simple to operate.

Harvey Windows can be customized to fit any design aesthetic and performance level, with a lineup that not only includes three vinyl double hung options, but also casement, awning, rolling, hopper, picture, and shape styles as well.

CASEMENT & AWNING WINDOW

Easy-to-operate Harvey casement and awning windows with improved handle provide clean, contemporary lines and maximum ventilation. There's no need to stretch to reach a top lock because the casement unlocks with one conveniently placed latch. The bottom of the awning tilts outward by turning the compact folding handle.

HANDLE

Easy-to-use, compact, full-flip folding handles tuck neatly into the cover for a modern, nested appearance.

Single latch, multi-point locking system is standard.

SHAPES & GARAGE DOOR TRANSOM

Thanks to Harvey's special vinyl forming process, you can add variety and individuality to projects with custom shapes.

Specialty shapes include octagons, triangles, round tops and full circles. Numerous grid options enhance interior design possibilities. Wood and PVC trim can be specified on any specialty window for added value and beauty.

Another great way to let in natural light and add a decorative element is with a custom transom above the garage. Standard grid pattern is 14-lite 5/8" contoured Grids Between Glass. Additionally, garage door transoms can be ordered in 2-or-3-wide common jamb.

BAY & BOW WINDOW

BAY

BOW

Harvey's bay and bow windows combine traditional style with the convenience of maintenance-free vinyl. They can be made from casement, picture, or double hung windows, with the same glass, screen, grid and color options. There are no exposed joints or caulking on the exterior of the unit.

CUSTOM ROOFS

All roof systems are fully framed and sheathed in 1/2" plywood. They are available in 16 oz. copper or solid aluminum and are also compatible with several other manufacturers.

INTERIOR/EXTERIOR FRAME FINISH UPGRADES

Bring the outdoors in with Harvey's vinyl garden window. Perfect for both new construction and remodel projects, garden windows are a beautiful setting for plants, collectibles or decorations.

Units come standard in white frame/laminate 4-9/16" jamb, and a choice of birch or oak veneer for the shelf and seat board.

Garden performance and style options include:

- ▶ Grid and color options
- ▶ Adjustable glass shelf (with polished edges and brackets/standards) can be added
- ▶ Waterproof insulation seat board

MORE OPTIONS & FEATURES

Bay: either 30° or 45° angles

Bow: 10° angle

Custom manufactured to fit virtually any opening

ENERGY STAR glass packages available

Multi-point lock on all casements

Insulated vinyl mullions

Edge banded finish jambs and head and seat boards in oak or maple veneer. Insulated seat board custom made to fit each unit*

MORE OPTIONS & FEATURES

Available in sizes up to 72" x 48"

High performance 1" insulating glass

Top lite (a constant 35° pitch) is tempered for improved safety and integrity

Support brackets are not needed

10 year warranty

*Seat board standard with white aluminum face only, color matched caps finish the outside edge.

PATIO DOORS

A patio door is an extension of a home, and should be an extension of a homeowner's style. Vinyl Patio doors are durable, low maintenance, and ENERGY STAR rated to perform well year after year, providing a bit of functional charm to any space.

PATIO DOOR

Along with standard sizes, Harvey vinyl patio doors can be custom-built to fit virtually any opening, so you get the look you want with the performance you expect.

Solidly constructed and reinforced with heavy-duty aluminum for added durability, they include welded sash corners to provide maximum strength, while multi-chambered frame extrusions further increase their stability and thermal efficiency.

FEATURES

- ENERGY STAR glass packages available
- 2, 3, and 4-lite design options
- Flushmount deadbolt standard on operating panels
- Standard non-keyed hardware included, keylock option available
- Blinds Between Glass option

MORE OPTIONS & FEATURES

- Multi-point lock options utilize four locking “claws” that engage simply by turning the knob
- Grids come in 5/8" and 1" sizes
- Custom grid configuration available
- Seacoast Hardware option for corrosion resistance; available in white or almond color-matched:
- Panel and screen rollers and roller track cover
- Fasteners, latch mechanism, offset keeper powder coat finish handle and includes Stainless Steel.
