

Kneewall with foam

Kneewall with picture window

VERTICAL

The Accu-Fit System is a 3-season **non-load bearing 3-1/4" wall system** that utilizes the combination of Harvey's two-piece thermally broken aluminum receptor system to create structural openings, and Harvey replacement windows to create a unique indoor/outdoor living space. Accu-Fit provides maximum flexibility and ease of installation*.

Rolling, Double Hungs, Picture or Casement replacement style windows can be used in this system. Combine with Harvey Vinyl Patio Doors or Therma-Tru® Smooth-Star® doors (standard installation required) to allow outside access.

Helpful Tip:

To order, please provide your local rep with Rough Opening measurements to the nearest 1/4" for accurate material allocation.

*All openings must be plumb, level and square.

Features

Receptor system is provided in lineal form to be cut and fitted in the field to fit any custom opening

Receptor is available in White, Almond, Black and Dark Bronze to match Harvey vinyl window paint options

Knee wall may be a solid panel or a picture window glazed with tempered glass

Maximum opening width 75";
Maximum height 100"
