

LIFE CONVERSION PREMIUM RATES

PREMIUM EXAMPLE

A 55-year-old is eligible to convert \$50,000 of life insurance due to termination of employment. As shown below, the premium rate for (\$1,000) of whole life coverage is \$67.08 annually. Therefore, if the person wishes to convert the full amount, their annual premium would be \$3,354.00 ($\$67.08 \times 50 = \$3,354$). We'll also apply an annual \$60.00 administration fee to make the total annual cost for a \$50,000 policy for a 55-year-old, \$3,414.00. If premium is paid quarterly, the cost would be \$853.50.

Now that you've been informed that you have the right to convert your coverage, the premium rates shown below will help you understand what you can expect to pay for continued coverage if you exercise your right to convert coverage and agree to pay premium directly to The Hartford.

LIFE CONVERSION

The policy's Life Conversion feature provides you with the opportunity to obtain an individual, whole life insurance policy that builds cash value as the policy matures. There are no mandatory age reductions and coverage can continue as long as you pay your premium when due. If you die prior to reaching the Scheduled Maturity Date (standardly age 121), the proceeds will be paid to your beneficiary. If you live to the Scheduled Maturity Date, the policy will terminate and the cash surrender will be paid to you without the need to file a claim.
