QUICK VISION APEX 302

Why Upgrade to a Vision Measuring System?

- Catch defects earlier and reduce scrap
- Measure faster without sacrificing accuracy
- Eliminate operator variability
- Handle complex parts traditional tools can't measure

Why Choose Mitutoyo Quick Vision?

1. Speed That Keeps Up With Production

Quick Vision systems are designed for high-speed, automated inspection, allowing you to measure multiple parts or features in a single run.

2. Accuracy You Can Trust—Every Time

Mitutoyo's advanced optics, edge detection, and autofocus ensure consistent, high-precision results — no matter the operator.

3. Reduce Operator Dependency

Traditional measurement depends heavily on operator skill. Quick Vision changes that.

4. Non-Contact Measurement = No Risk to Your Parts

Measure delicate, soft, or complex components without touching them.

5. One System, Endless Applications

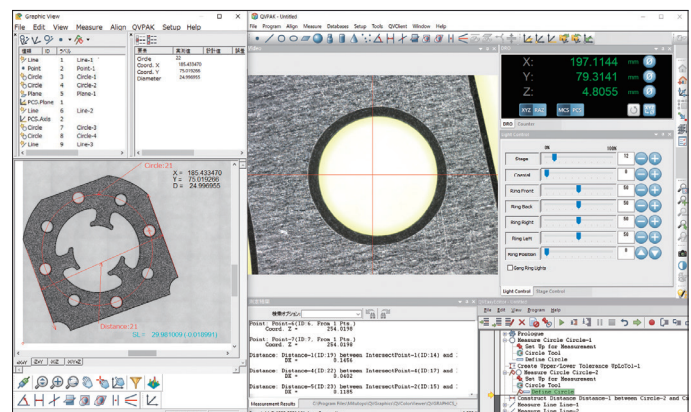

From simple dimensions to complex geometries, Quick Vision systems handle it all.

6. Complete Turnkey Package

Every system includes everything needed to get started:

- PC and QVPak Software
- A2LA Accredited Mitutoyo Installation and Calibration
- Training
- 1 Year Warranty
