

AUDIBEL

Give patients
a **superhuman**
advantage.

ALL NEW

ARIS^{AI}+

FOR PROFESSIONAL USE ONLY

Your challenges require bold solutions.

Aris AI has been Audibel's best-selling hearing technology ever. Patient reactions point to a big reason why: **our DNN technologies simply sound and perform better.**

Now, anchored by our **G4 Gen AI Neuro Processor**—which features a neural network baked directly into the silicon—all-new Aris AI+ widens our lead in AI with a brain-inspired, multi-DNN architecture that processes sound faster and more naturally than ever before, all while consuming minimal power.

If you're looking for a **full product line** that gives you everything you and your patients want, plus, Aris AI+ is it.

+ **Up to 2.7x faster** than a leading competitor device evaluated at the time of testing¹

Meet the world's first DNN Dual Compressor.

Compression has always been a tradeoff—until now. Aris AI+'s **industry-first** DNN Dual Compressor automatically, accurately, and intelligently determines when to activate fast compression for speech and when to preserve slow compression for sound quality.

It's the kind of real-world intelligence our AI-powered hardware architecture enables—and makes listening experiences more natural and fluid.

+ 100% of users noticed fewer artifacts
compared to previous technology²

Always-on
optimization.

Easy from
the start.

Audibel's breakthrough on-demand AI feature, Edge Mode, delivers powerful, real-time optimization of speech audibility and noise management. It's why you and your patients keep asking for the option to **keep it on all the time.**

Aris AI+ gives you that option—intelligently of course. We've removed the effort to activate Edge Mode by enabling it to default in Memory 1.

We've given Edge Mode another enhancement, too—a DNN boost that delivers even more comfort in noise³.

+ Edge Mode **improves listening effort** compared to the Personal program³

Forward, charge.
Confidence, always.

Hearing aids that sound as exceptional as Aris AI+ deserve battery life, seamless connectivity, and durability to match.

**Waterproof
design**

UP TO
51 hours
battery life

ALL NEW
**StarLink
Charger 3.0**

With its redesigned shape, texture, and intuitively colored LED lights, it looks and feels as advanced as it performs.

**All with over a 99%
on-time delivery rate⁴**

A woman with long, wavy brown hair is smiling and looking down at a small, black, oval-shaped case she is holding in her right hand. The case is open, revealing two custom hearing aids inside. She is wearing a dark blue or black top and a silver necklace. The background is dark and out of focus.

Superhuman sound, now in custom.

Audibel custom products are already known for their craftsmanship, durability, and performance. Now Aris AI+ ITC/ITE R hearing aids **include our proprietary DNN 360 technology**, which is proven to decrease listening effort compared to our previous directionality technology⁵.

It lets you fit patients with one of the most personalized, intelligent experiences ever offered in custom technology.

COMING SOON
STARLINK CUSTOM CHARGER 3.0

Small details. Monumental impact.

Aris AI+ also **introduces custom non-wireless (NW) products into the family**—a signature lineup that gives users not only the smallest devices, but the smartest experience they've ever had in a custom form factor.

These smallest of smalls even feature **Automatic Edge Mode**, which dynamically updates parameters as environments change. It's something they could never do before.

Invisible control for invisible devices

To make Aris AI+ custom NW devices even more discreet, we've replaced T2 tones with a new ultra-high-frequency tone detection system. Wearers can't hear it, but their hearing aids can—making it reliable and robust enough that our **IICs can access Edge Mode**.

Smarter alerts. Deeper insights. Better everyday living.

The latest **My Audibel** enhancements bring industry-first intelligence straight to Aris AI+ wearers—expanding convenience, wellness insights, and peace of mind.

- **Hearing Aids Left Behind** *Industry First*

The My Audibel app now alerts users when they've left their hearing aids behind—giving wearers even more reliable, meaningful prompts when they matter most.

- **Sleep Quality Tracking** *Industry First*

Also new to My Audibel is sleep quality tracking. Aris AI+ RIC wearers can receive a nightly sleep score along with detailed insights on sleep cycles (awake, light, deep) and body position (side or back).

AUDIBEL

Everything you want, +

With Aris AI+, you get the
power of a platform designed
to expand what's possible
in hearing technology.
