**Better hearing never
sounded so good**

AUDIBEL

Trust your hearing to Audibel

Can't hear as well as you used to? That can happen to the best of us. But when you can't hear people speaking or birds chirping, it's time to take action.

We all know that hearing loss can make you miss out on the moments that are most meaningful in life. Did you know studies show it can also lead to **increased risk of falls, depression, anxiety, even dementia?**

If you notice a change in your hearing, seeing a hearing care professional is a smart first step. They've got the experience to help you hear and live better.

Your hearing is important.
Trust a professional to help treat it.

No one will know

Gary and Kathi are wearing discreet **Intrigue AI** hearing aids.

Don't settle for ordinary

While all hearing aids amplify sounds to help you hear them, Intrigue AI features cutting-edge technology designed to help you understand them, too.

Hearing loss might start in the ears, but it happens in the brain. Audibel's patented Neuro Sound Technology mimics our cerebral cortex — processing sounds the way a “normal” auditory system does and filling in the gaps produced from years of hearing loss.

It does all this up to 80 million times per hour, automatically, without you needing to do a thing.

Designed to help wearers:

Distinguish words and speech
more intuitively and naturally.

Hear soft sounds
without distracting noise.

Reduce the effort
it takes to listen and hear.

Easy on the ears

Crafted from meticulous research to ergonomically fit the ear, Intrigue AI hearing aids have been reimagined to deliver superior sound, comfort, and durability

Waterproof*, sweatproof, everyday-proof

Pro8 HydraShield technology helps ensure they can withstand sweat, dirt, dust, drops and dunks.

All-day rechargeability

Be confident you won't run out of power, with long-lasting rechargeable options, including the industry's longest-lasting RIC (up to 51 hours on a single charge.)

Styles that won't cramp yours

From custom in-the-ear styles to sleek behind-the-ear ones, they're comfortable to wear all day and barely noticeable to others.

*Up to 3 feet depth. Rechargeable styles only.

Stream, Connect, and Engage

Exceptional by themselves, Intrigue AI hearing aids deliver more benefits when paired with our easy-to-use My Audibel app.

Edge Mode+

Optimizes sound quality on-demand for either clearer speech or improved listening comfort.

Binaural streaming

Streams calls, music and more to both hearing aids directly for more true-to-life listening.

Health monitoring

Uses the science of the ears to accurately count steps, track engagement and help you achieve well-being goals.

Fall detection

The only hearing aid that can detect falls and alert family or friends.
