

# Marketing Automations Program – Network Exclusive Offering

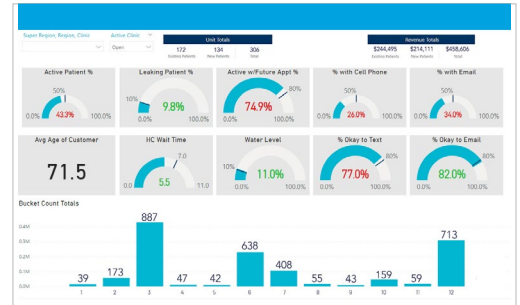

Get the most out of your database with our Marketing Automations Program!

## Patient Vitality Reporting

With access to real-time patient data, we can create a vitality report on your database. This will allow you to better understand the makeup of your patient base. With this information we can identify revenue opportunities, make strategic changes to your marketing strategy, and better understand the health of your business.

We are offering an opportunity to create a Patient Vitality report for your own practice, based on your own data.

Your patient database is a treasure trove of insights on the health of your practice. Established practices can generate more than 50% of their practice revenue from current patients. Having a solid understanding of your current patient activity is essential and a key input into your marketing plan.

**5 Reasons**  
why you should upgrade your hearing aid right now!

**INTRIGUE<sup>AI</sup>** has the industry's:

- **Most Advanced** processor technology, dramatically improving speech clarity in noisy environments - 22,000 adjustments per second.

## Email Automations

- Audibel has created over 100 emails across the patient journey to make patient communication quick, easy, and impactful
- Stay in contact with your database with email automations!
- Email automations allow you communicate with people in your database with the right message at the right moment, based on where they are in their journey to better hearing.

### Examples of different patient journeys:

1. A patient that has not been in your office in 3+ years
2. A patient who came in for a test but did not purchase
3. A prospective patient from your Facebook leads
