

Hear better. Live better.

Business equipment for your practice

*All your business essentials.
All in one place.*

Equipment solutions. **Simplified.**

State-of-the-art diagnostic equipment is essential to providing the best patient experience at your practice. With the help of Starkey Business Equipment Services, it's never been easier to find and maintain the right solutions for all your testing and fitting needs—all in one place.

Practice essentials. Sound expertise.

Let Starkey's seasoned Business Equipment team be your guide through our complete selection of industry-leading equipment—everything you need from a patient's first visit to their hearing aid follow-ups.

We not only assist you in finding the best solutions for your individual practice, but also provide any technical support you may need to use or set up your equipment.

Equipment services. Easier than ever.

From browsing and purchasing to helping you maintain your modernized practice—look no further than Starkey to help you elevate your practice and patient experience into the future.

And because we stand by the quality of our selection, we additionally offer a **two-year limited warranty on all new Inventis equipment**, plus service and repair services on all Inventis hearing test equipment and audiometers.

Audiometers

CELLO

PC-based diagnostic

Performs the basic audiometry functions of air, bone, and speech, with additional tests including QuickSIN (QSIN), optional high-frequency audiometry, and video-VRA.

Starting at \$5,550

HARP

Diagnostic audiometer

Diagnostic audiometer capable of performing basic and advanced testing. Pure tone and speech audiometry available for air and bone as well as additional tests such as: ABLB, SISI, Stenger, Tone Decay and more. Optional add-on of TEN test is available; QSIN comes standard.

Starting at \$4,750

PICCOLO

PC-based portable audiometer

Fully PC-controlled audiometer to perform basic audiometry functions. Different models available for additional testing functionality (air only, air and bone, or air, bone, speech, and QSIN).

Starting at \$2,475

Audiometers

TRUMPET AUD

Fully PC-controlled audiometer

Trumpet AUD can perform basic audiometry (air, bone, speech), QuickSIN, and free field pure tone and speech testing.

\$5,190

PIANO

Clinical audiometer

Clinical audiometer with two channels, great for clinics that perform a variety of diagnostic evaluations. Can be operated through the audiometer or through PC. Piano offers a complete battery of tests, plus advanced diagnostic options: air, bone, speech, SISI, Stenger, TEN test, QSIN, and more. Inquire with our Business Equipment team for the full battery of tests that can be added on.

Starting at \$7,315

TRIANGLE

Screening audiometer

The Triangle is a lightweight, lithium-ion rechargeable battery-operated mobile audiometer for basic air and bone testing with 12+ hours use time. Bone conduction with masking is available as an upgrade.

Starting at \$1,310

Tympanometers

TIMPANI

Handheld tympanometer

Handheld automatic tympanometer with optional docking station to recharge and transfer data to a PC. Additional portable mini printer also available. Tympanometer add-ons include: 1 kHz probe tone, ipsilateral acoustic reflex testing, and screening pure tone audiometry.

Starting at \$3,230

FLUTE

Diagnostic middle-ear analyzer

Available in Basic or Plus models, the Flute is a diagnostic tympanometer capable of fast and reliable middle ear analysis. Both models can connect via USB port to your PC for live viewing of the exam results or easy saving to the Inventis Maestro or Noah database.

Basic

Starting at \$4,805

Plus

Starting at \$6,240

Basic includes automatic tympanometry and automatic ipsilateral and contralateral acoustic reflex testing. **Plus** includes Basic features, as well as manual tympanometry and acoustic reflex testing, acoustic reflex decay and eustachian tube function testing.

CLARINET

Clinical middle-ear analyzer

Desktop diagnostic tympanometer with touchscreen. Its features include automatic and manual tympanometry, acoustic reflex threshold, decay, and latency examination, eustachian tube function testing, plus high-frequency and multi-component tympanometry. Great for diagnostic, medical settings.

Basic

Starting at \$7,720

Plus

Starting at \$8,440

Fitting equipment

TRUMPET REM

Fully PC-controlled REM system

The Trumpet REM system offers wired or wireless probe tube measurements for quick, easy, and reliable real ear measurements. Easily connect to your PC and save information directly to NOAH. Multiple popular stimuli available.

Starting at \$5,849

DRUM

Hearing Instrument Test Box (HIT)

Hearing instrument test (HIT) box with automatic IEC and ANSI standard sequences. The internal design makes for easy hearing aid positioning on acoustically-transparent material. 2cc coupler for custom, RIC, and BTE styles. Easily connect to your PC via USB and utilize the Maestro software with the option to transfer directly to NOAH. Use in combination with the Trumpet REM for RECD.

\$6,105

MODIFICATION BENCH

Custom modification bench

Custom modification bench manufactured by Starkey that includes easy storage, UV light box, built-in Wells buffer with High-Speed adapter, an accessory kit, and instructions.

\$5,750

Combination units

VIOLA PLUS

Audiometer & tympanometer

The Viola Plus is a combination unit comprised of a screening tympanometer and audiometer. The tympanometer can perform automatic tympanometry, acoustic reflex, and acoustic reflex decay while the audiometer performs pure tone (air and bone) and speech audiometry.

Starting at \$7,195

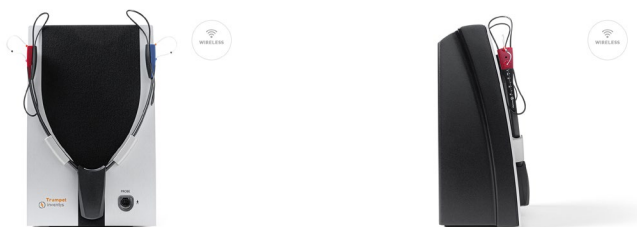

TRUMPET REM/AUD

Audiometer and REM system

The Trumpet is a scalable system that can be used as an audiometer (Trumpet AUD), real-ear measurement system (Trumpet REM), or combination of the two (Trumpet REM & AUD). See specifics of each individual system under their designated sections.

Starting at \$8,819

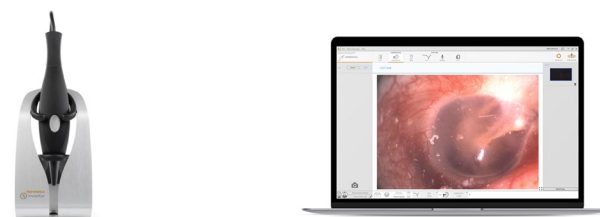

Video otoscopes

INVENTIS HARMONICA

Handheld video otoscope

The newest video otoscope option, the Inventis Harmonica, connects to your computer with no installation required to easily save and print images. The Harmonica is also NOAH compatible. This video otoscope offers a storage cradle and can be easily transported if needed.

Starting at \$1,990

JEDMED NEX-GEN-HDOTO

Video otoscope

The JEDMED Nex Gen HD video otoscope is a great solution for in-office use. Connect to a TV monitor to display crystal clear resolution with no installation required – simply turn on the Nex-Gen-HDoto and it is ready to use. Perform pneumatic otoscopy or cerumen management with optional add-on attachments.

\$7,500

Supplies

EARTIPS FOR TYMPANOMETER

PROBE TUBES FOR TRUMPET REM

INSERT EARPHONE TIPS

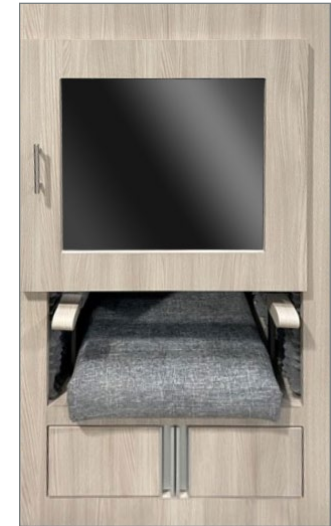

SPECULA FOR VO

CURETS FOR JEDMED VO

Sound rooms/Enclosures

PERSONAL SOUND ENCLOSURE (STARKEY MANUFACTURED)

\$4,499

SOUND BOOTHS (ECKEL)

Starting at \$12,000
