

Livio Edge AI 2.4 GHz Custom Rechargeable Hearing Aids

Only from Starkey: The Experts in Custom

Unequaled features, connectivity & rechargeable

Why RECHARGEABLE custom

- Custom comfort
- Optimal dexterity
- Best for masks
- No external batteries & easy charging
- Ideal for virtual appointments

What is the benefit

- 2.4 GHz connectivity & rechargeable
- Healthable features with Fall Detection
- Find my Phone
- Edge Mode for difficult situations and masks
- Artificial Intelligence for better performance
- Easy recharging case and charger interface

How it works

- Connect quickly and easily with your NoahLink programmer
- Binaural direct connection to Apple® and Android™ compatible devices
- Simple charging case provides up to 24 hours of power in a single charge
- Long lasting battery life; 23 hours with 4 hours of streaming
- Sensors and Tap Control offer industry leading convenience
- Available in ITE, ITC and HS styles and in all standard colors

What your peers are saying

"I cannot believe the effort, creativity and design that must have gone into building these!"

"No sacrifice for features and performance."

Livio Edge AI 2.4 GHz Custom Rechargeable Hearing Aids

Only from Starkey: The Experts in Custom

How it helps you

Problem — Hearing aid wearers have long preferred custom devices for a multitude of reasons, but have always had to compromise features and performance for custom convenience.

Solution — The introduction of 2.4 GHz rechargeability and state of the art technology in a custom package give today's patients additional convenient and attractive options to meet their needs, and unique offerings for hearing professionals.

Proof points

Throughout the COVID-19 pandemic, there have been public information blogs and websites describing the problems that patients are encountering wearing face masks and hearing aids together. Boys Town National Research Hospital published information on their Patient portal as early as May 2020.

Audibility while wearing masks creates difficulty even with normal hearing individuals and now compounds the difficulty with hearing aid wearers. See how Edge Mode and Mask Mode are quick and easy ways to help patients hear in the most difficult situations.
