

AUDIBEL

Deliver the **power** of unstoppable hearing

VITALITY^{AI}

VITALITY^{AI}

Joyful hearing for all

You've always wanted the best technology to treat your patients' hearing loss, regardless of the degree. You strive to ensure they are connected, fully engaged in their lives, improving their health and wellness, while enjoying every minute of it.

Audibel Vitality AI is the hearing technology built to help every degree of hearing loss and keep all your patients active and energized:

Conventional patients

Those who have hearing loss and hope to restore it.

Proactive patients

Those who know its comorbidities and want to prevent them.

Digitally savvy patients

Those looking to take advantage of the performance hacks today's best technologies provide.

"Now I can understand everything my granddaughter is saying and we have a better conversation."

Stan C.
Retired Design Engineer

"My hearing loss isn't severe. But at this stage in my life, I want to be proactive."

Sherry L.
Property Manager

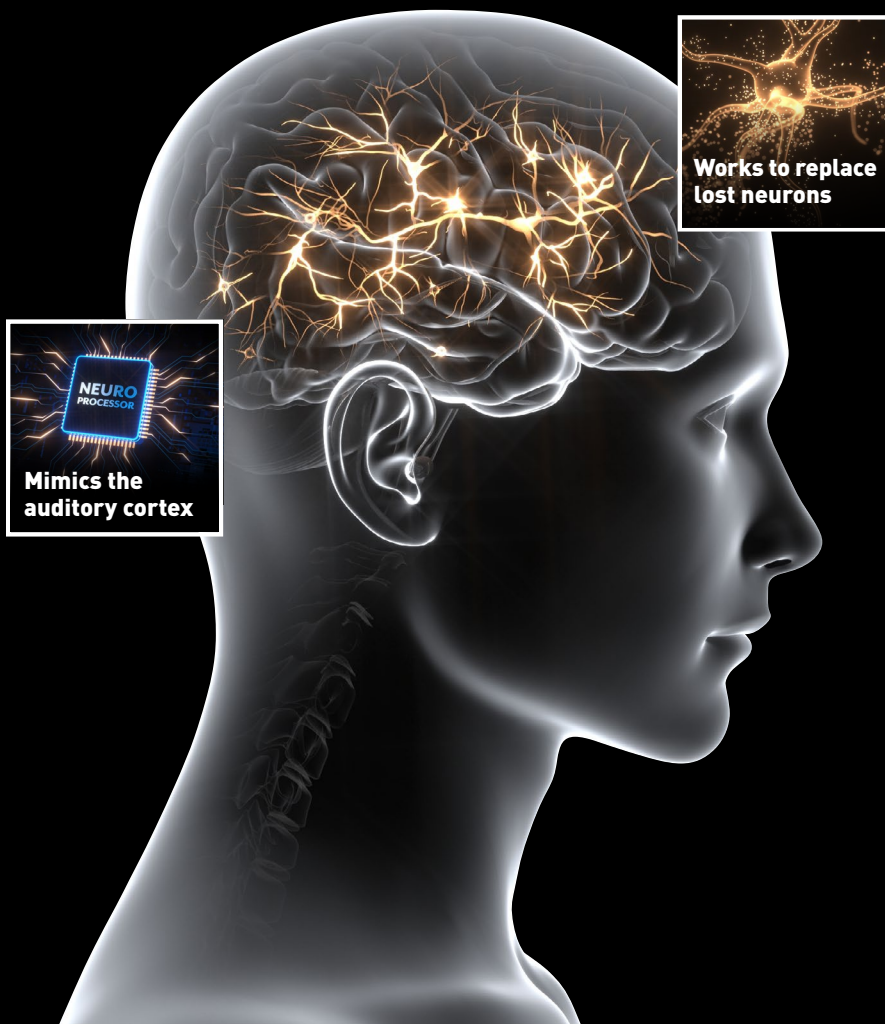

"These hearing aids don't lack anything in terms of their technology."

Kevin A.
Retired Small Business Owner

Faster processing delivers superior results

Powered by our new G2 Neuro Processor—which features the industry's only neural processing unit (NPU) fully integrated into the chip—and **Neuro Sound Technology 2.0**, our proprietary, best-in-class sound experience system, Vitality AI lets you give every patient who walks through your door the cognitive boost they've been looking for.

No other sound experience comes close

Like the human brain's auditory cortex, Vitality AI's integrated NPU **classifies complex soundscapes, enhances speech, and reduces noise** all in realtime with advanced and powerful AI at the edge.

The same innovation that makes our proprietary **Edge Mode+ feature** so sharp is now integrated into Neuro Sound Technology 2.0, making it our smartest, most precise noise management system ever.

30%

Future-proof connectivity

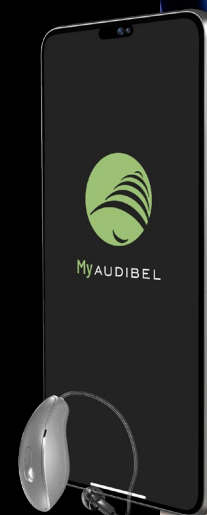

Vitality AI integrates the **ALL-NEW Bluetooth® Low Energy (LE) Audio** streaming protocol, which consumes less power and delivers the next-generation connectivity standard across the electronics industry. By switching to LE Audio, Vitality AI hearing aids pair more easily, connect more quickly, stream more robustly, and are *Auracast™* ready.

Better hearing is just the beginning

Today's new wave of patients wants control, convenience and as much value for their investment as they can get. Vitality AI—combined with the My Audibel app—gives them all that and more.

- **A control center for their hearing aids** — now with ALL-NEW, Apple Watch compatibility.
- **Features that make every day easier** — including TeleHear sessions and more.
- **Benefits beyond better hearing** — including an ALL-NEW self-guided balance assessment exercise.
