We listen—so you can hear

Congratulations for taking steps to support your hearing health today.

Treating any hearing loss is one of the best things you can do to maintain not only your quality of life, but also your overall health.

“This technology allows me to continue to do the things I love.”

Better hearing helps you stay connected to the people you care about. It fosters confidence, communication, participation, and the **joy of experiencing the world around you**.

And by maintaining awareness of your surroundings and every moment that matters, your risk of health conditions like cognitive decline, isolation, depression, and falls decreases.

Paired with the guidance of an experienced hearing care professional, Audibel's **Aris AI hearing aids** are today's best choice for maintaining the joy of hearing—and living—into the future.

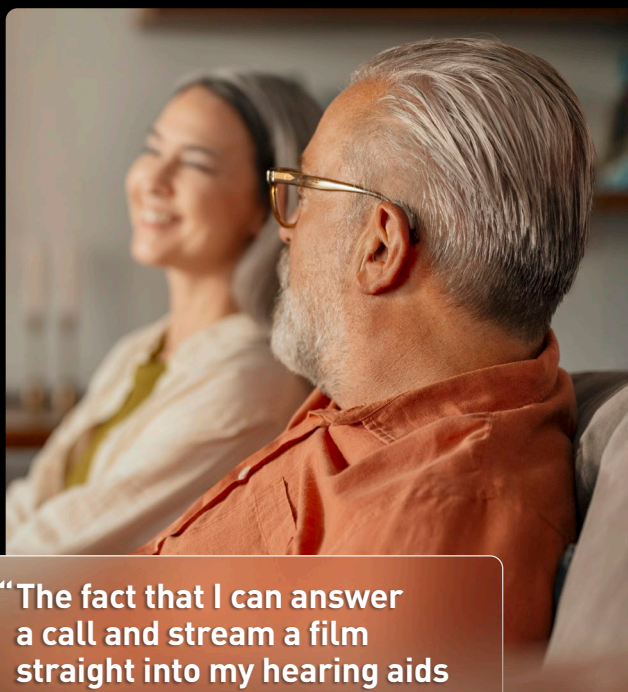

Every connection, hearing perfection

Technology designed to help you improve your hearing and quality of life should feel natural, seamless, and individual to your needs—so **you'll never miss a beat.**

It should allow you to easily connect and forget about your hearing loss, whether you're at home watching TV, with friends at a crowded restaurant, or in any situation—room to room, moment to moment.

It should be **all-new Aris AI** hearing aids—built with sound clarity that instills connection, durability that drives confidence, and innovation that promises unstoppable living.

“The fact that I can answer a call and stream a film straight into my hearing aids is just revolutionary to me.”

The sound of endless possibilities

Aris AI hearing aids don't just keep up. They redefine what it means to be modern and discreet yet durable and comfortable for all-day wear.

Sleek, subtle, comfortable

They're waterproof*, everyday-proof, and designed to go the distance of your day and then some. All while tailored to your unique hearing needs.

*Waterproof up to 1 meter. Rechargeable styles only.

Joyful hearing at every turn

Aris AI is designed to restore the normal sense of hearing closer than any technology of its kind.

Maintain your awareness

Hear key environmental sounds and the start of speech more clearly, helping you stay aware of your surroundings.

Understand speech in noise

Hear speech with improved clarity in noisy environments and stay engaged in your conversations.

Hear as you go

Navigate through different listening environments, knowing your hearing will adapt as you go.

Instant clarity when you need it most

Unexpected listening conditions in places like restaurants or crowded events have nothing on **Edge Mode+**—a proprietary feature of Aris AI that gives you the on-demand ability to zero in on speech in any challenging environment.

"I can hear everything really clearly."

Stay connected wherever life takes you

Enjoy more control, convenience, and connections by pairing Aris AI with the **My Audibel app**.

Stream audio anywhere

Aris AI's integrated Bluetooth® LE Audio lets you seamlessly stream TV, music, airport announcements, and more through Auracast™ technology.

Track health and hearing

Improve overall health with features that let you track steps and social activity, monitor respiratory rate, and bolster balance.

Make every day easier

Easily stream calls, switch programs, request sound adjustments, set reminders, and more—all at your fingertips.

Have a say in your hearing experience with Gen AI

Use your voice to learn more, make sound adjustments, and control your hearing aids—all while hands-free or on-the-go: **Introducing Gen AI technology**, now available in two of the My Audibel app's key features:

TeleHear AI

TeleHear AI listens to your sound concerns then creates an **instant adjustment** for your devices based on thousands of professional fittings. Try it then apply it, plus resume your original setting anytime.

Gen AI Smart Assistant

Gen AI Smart Assistant lets you **ask questions about your hearing aids** or any topic, then provides detailed, conversational answers. You can also use it to change programs, set reminders, and more.

For convenience and control you can count on, look no further than Aris AI.
