## CTI TECH TIP

### Engine Performance At A Glance

You have a vehicle in your bay with a customer complaint of poor performance. There is a laundry list of possible root causes but who has time to test everything on the list? None of us, of course! What can we do to ensure we have good breathing, fuel delivery, no fuel trim shifts and no default/depower states? An Analytic Test Drive, that's what. Record the data and review it back at the shop with a nice hot cup of coffee in your hand.

#### Design your drive cycle:

There are six specific phases to this drive trace.

- Idle no-load: The test drive begins by recording data at idle with no additional load on the engine for approximately 5 seconds.
- Light acceleration: Next, accelerate lightly to 20-30 MPH while using only 15%-25% throttle.
- Wide-open throttle acceleration: When safe to do so, we apply the accelerator pedal to the floor for 2-3 seconds while maintaining a lawful speed.
- Hard deceleration: Release the accelerator pedal quickly and completely.
- Light acceleration to cruise speed: Accelerate lightly to 30-45 MPH while using approximately 25%-55% throttle. Maintain normal driving for 15-20 seconds.
- Idle no-load: The test drive ends by returning to a no-load idle condition for at least 5 seconds.

#### Using the Global side of your scan tool

- Select and record the following data PIDs to analyze back to the shop
- Engine RPM
- Engine Load and/or Absolute Load
- MAP or MAF
- TPS
- O2 voltage or AFR EQ Ratio
- STFT and LTFT

When you analyze the data, you need to make comparisons based on the load range of the engine during the test drive.

Here are just a couple of scenarios:

- Load is low at WOT while the TPS shows a completely open throttle. You have a breathing issue.
- Fuel trims are very positive but only at high loads. Stop looking for vacuum leaks, you have a fuel delivery issue.
- Fuel trims are very positive but only at very low loads. Put the fuel pressure tester away, you have a vacuum leak. For more in-depth information on PIDs and what they mean look at SAE Document J1979/ISO 15031-5, available online. CTI offers a 4-hour course on this time saving technique at CTIOnline.com. Happy diagnosing!
