BREMBO PRIME CERAMIC BRAKE PADS

Prime ceramic pads ensure comfort and quality, with a specific focus on performance. Their friction materials and product design minimizes noise and vibrations to deliver quiet, high-performance braking.

brembo
OFFICIAL PARTNER

Brembo brake pads ensure maximum safety thanks to absolute control of all production stages. From research and development to testing, passing through production of the friction compound and mechanical processing, every step is monitored and verified to ensure best-in-class- braking solutions. With a focus on unbeatable quality, comfort, and cleanliness, Brembo Prime ceramic brake pads deliver what the most demanding motorists want.

- **OE-Equivalent Friction** – Specifically engineered to enhance braking power, minimize braking distances, and provide quiet stopping in all conditions
- **Ceramic Formulation** – Reduces friction wear and lowers dust for cleaner wheels and rims
- **Slots and Chamfers** – Ensure comfort and performance, reduce noise, and improve cooling
- **Anti-Noise Shim** – Multiple layers help prevent noise and vibration
- **Easy Installation** – often include abutment hardware to ensure problem-free installation

BREMBO PRIME UV COATED ROTORS

Prime UV coated rotors are designed to be a seamless replacement for original equipment, ensuring a hassle-free installation with the added assurance of the Brembo name.

brembo
OFFICIAL PARTNER

Brembo is crafted with precision and driven by passion. Quality and reliability shine through, enabling motorists to experience the difference and enjoy a new, satisfying drive.

- **High Carbon Content** – Minimizes noise and vibration and maximizes performance
- **Patented Design** – Exclusive Pillar Vented System enhances cooling and heat dissipation for improved performance
- **Unique Coating** – Metallic finish that maintains a clean and bright appearance over the entire lifespan of the rotor
- **Surface Protection** – Protective coating on braking plate surface, external diameter, and hub to ensure complete protection
- **Respect for the Environment** – Water-based paint is free of chemical solvents and uses an energy-efficient UV coating process
