

 AXON

Axon Signal Sensor Holster Compatibility Catalogue

[axon.com](https://www.axon.com)

In quickly-evolving situations in the field, remembering to activate a camera may not be at the forefront of decision-making. Signal Sensor is a smart sensor designed to automatically activate configured Axon devices when a firearm is drawn from its holster, helping ensure that critical moments are recorded without requiring manual camera activation. Signal Sensor attaches to most standard firearm holsters and wirelessly connects to Axon's body-worn and Fleet in-car cameras, triggering recording when it detects a weapon being unholstered to enhance safety, transparency, and evidence collection. Signal Sensor must be used with compatible firearm holsters in order to function. This catalogue details the compatible holsters, organized by weapon manufacturer, holster brand, and weapon model.

Axon is expanding Signal coverage through with more integrated holsters and compatible brackets than ever. Here's what's coming at a glance:

New Integrated and Redesigned Safariland Holsters for Signal Compatibility

As part of our OEM partnership with Safariland, we are pleased to offer the following brand-new integrated holsters with a dedicated spot for Signal Sensor. Holsters from Safariland's popular 6000 series are being redesigned to incorporate a dedicated spot for Signal Sensor.

Safariland Integrated Use of Force Pouches

Safariland has designed six new UoF pouches to have a dedicated spot for Signal Sensor. Now, capture incidents across the Use of Force spectrum, including uses of OC spray, batons, and handcuffs, on video with hands-free camera activation.

Other Use Of Force Equipment

Type	Safariland Model
OC Pouch	37
OC Pouch	38
Baton Pouch	35
Baton Pouch	135
Cuff Pouch	90
Cuff Pouch	190

New Bracket Coverage:

Browse our upcoming new brackets, which will cover over 500 holster models and more than 1,000 firearm and weapon light combinations.

- Small Light = TLR-7
- Large Light = SF x300 & TLR-1
