

Axon Interview Portable Kit

Axon Interview Portable Kit is a mobile interview solution that allows agencies to capture interviews in the field with the security and dependency of a full interview room solution. No more worrying about missing critical statements in the field and/or time-sensitive information — the Axon Interview Portable Kit gives officers the ability to collect statements anytime, anywhere and be able to livestream it back to your agency’s network.

Lighter and Leaner

Axon Interview Portable Kit is 35% lighter and 20% smaller in size as compared to earlier version. At under 22lbs, officers can easily transport it in the field.

Reliable Mobile Solution

Axon Interview Portable Kit allows an agency to confidently take their secure interview solution into the field in an easily transportable package.

Always Have a Witness

Live, secure streaming over an agency’s VPN allows the presence of a remote witness, potentially command staff or state-mandated, no matter where the interview is being conducted.

Never Miss a Critical Statement

Officers don’t have to worry about missing a timesensitive statement in situations involving several witnesses, and can conduct interviews on the scene with individuals who are unable or reluctant to go into the station.

Ready to Interview in Minutes

Created with urgency in mind, the entire solution can be up and running in under 5 minutes and can be easily stored in the trunk of a vehicle. When not in use, the camera and microphone can be fully disconnected for easy storage and transport in the kit.

Centralize Your Interviews

Easily capture and securely store mobile interview recordings on the Axon Evidence platform alongside other types of digital evidence at your department. In addition, all interview metadata is retained on the platform for efficient search and retrieval.

Built for Law Enforcement

Axon Portable Interview Kit is a transportable solution created with the needs and requirements of law enforcement in mind, such as secure chain of custody with audit trails viewable in Axon Evidence, and the ability to securely deliver recordings to Prosecutors and Public Defenders for e-disclosure via the Axon Evidence Prosecutor Portal.

Axon Portable Interview Features and Benefits

Wired and Wireless Offload

The kit provides three USB 3 ports and, using optional 4G LTE, users can securely offload interviews to Axon Evidence while in the field. Alternatively, interviews can be offloaded via wired ethernet or wi-fi at the station.

Multi-View Capability

With two included cameras, the integrity of a full interview solution is maintained as you are able to capture footage of both the interviewer and the interviewee.

Dedicated Microphones

The new kit has two microphones connected to each camera. This provides better audio capture with both interviewee and interviewer having their own microphone.

Remote Viewing

With the Live Streaming application, investigators and command staff can watch and listen in on critical interviews without having to be physically present.

Battery Backup

Axon Portable Interview Kit has a rechargeable battery, leaving you worry-free while conducting interviews in the field. An attached plug allows you to charge the solution while in use.
