

Axon Updates June 2025

The schedule for the **June 2025** release is as follows:

- Customers in the Enterprise region (.ent.evidence.com), Canada (ca.evidence.com), the Netherlands, new European region (.eur.evidence.com), and European legacy region (.eu.evidence.com) regions receive on **June 24, 2025**.
- Customers in U.S. Federal (.evidence.com) and U.S. law enforcement receive on **June 25, 2025**.
- Customers in Australia and New Zealand (au.evidence.com), South America (.la.evidence.com), and the United Kingdom receive on **July 1, 2025**.

For information on the update schedule times for your region, refer to the [Axon Evidence Maintenance Schedule](#) on the Axon website.

We don't expect any downtime during this update.

Additional help documentation for the products included in these release notes is located at axon.com/help.

Digital evidence management

Core platform updates

Security settings redesign

With the June release, the Security Settings under the Axon Evidence Admin tab will have a new look, with a new tile layout and clearer sections for easier navigation.

[Improvement](#) | [Admin](#) | [Federal](#)

Security

Strengthen security with customizable controls to protect access, prevent breaches, and ensure compliance.

 Enabled <p>Sign-in Policy Customize the security policy when users sign in with Axon's system, including MFA, timeout and lockout.</p> <p style="text-align: center;">CONFIGURE</p>	 Disabled <p>Password Policy Set password requirements for your agency's users.</p> <p style="text-align: center;">CONFIGURE</p>	 Disabled <p>IP Restrictions Restrict user access to pre-configured IP addresses.</p> <p style="text-align: center;">CONFIGURE</p>	 Disabled <p>Single Sign-On (SSO) Allow your users to sign in to your Axon products using your agency's SAML-based SSO solutions.</p> <p style="text-align: center;">CONFIGURE</p>
 <p>Application Settings Customize settings specific to applications using Axon's sign-in system.</p> <p style="text-align: center;">CONFIGURE</p>	 Enabled <p>Sign-in Agreement Display a sign-in agreement and require user consent before granting access to the system.</p> <p style="text-align: center;">CONFIGURE</p>	 Disabled <p>Automatic User Deactivation Automatically deactivate a user account if they have been inactive for a pre-set number of days.</p> <p style="text-align: center;">CONFIGURE</p>	 <p>Expire All Password Expire passwords for all users, prompting them to reset their passwords upon signing in.</p> <p style="text-align: center; background-color: #c00000; color: white;">EXPIRE ALL PASSWORDS</p>

Partner API updates

The Axon Evidence Partner API Guide has been updated with the changes to the Partner API. You can view the API Guide at <https://developers.axon.com>. If you are unable to access the API Guide site, see [Accessing the Axon Developer Community](#).

The following changes are part of the Axon Partner API for June:

- New permissions for Community Request endpoints - on the API Client registration page, you'll find a section for Community Request with two new permissions: Create Invite (required for the [Create Incident Report](#) request) and Edit Portal (required for the [Update Incident Report](#) request).

New | Federal

AI-powered features

Features including the AI Era Plan tag (**AI Era plan**) use artificial intelligence to provide insights, recommendations, or analysis based on available data and user inputs. These outputs may include inaccuracies, limitations, or outdated information. These tools are designed to support—not replace—professional judgment, legal interpretation, and human oversight. Users are responsible for carefully reviewing and verifying AI-powered content before acting on it. Axon continually works to enhance AI accuracy, mitigate bias, and uphold ethical standards. Learn more at [Axon AI](#).

Looking for what's next? See the Coming Soon section for AI-powered features planned for future releases.

Axon Evidence

Axon Auto-Transcribe

New transcription languages

New beta transcription languages are available, including Bulgarian, Norwegian, and Danish. Learn more at [Language support](#).

Beta | **AI Era plan** | Federal | **UI-Accessibility**

Axon Community Request

Community Request captions

Administrators can configure portals to allow or prohibit community submitted captions. Captions allow the community member to provide a free text response with each file uploaded. The captions are stored with the evidence and available in the evidence and portal audit trails when sharing. For more information, see [What Community Members See](#) and [General settings Axon Community Request](#).

New | **Admin** | **Federal** | **UI-Accessibility**

Resolved issues

- We made a fix when some evidence uploaded from Android Devices using various versions of Google Chrome provided recorded on dates in 1899, 1900, 1901. When this occurs the user will see the recorded on date displayed as a blank value and must be manually updated. Recorded on date does not have an impact to retention of Community Request evidence.
- We corrected a bug when a user input '983' as an area code. We updated the product to support new area codes across the US.

Draft One

Draft One usage report

You can now generate a Draft One usage report from the Reports panel in Axon Evidence to see how often Draft One is being used by your agency.

New | **AI Era plan** | **UI-Accessibility** | **Federal**

Narrate more details

Now, after selecting evidence and generating an initial draft, you can select Narrate More Details to provide additional information that Draft One can incorporate into a second version of the draft narrative. After viewing the new version, you can provide additional narration to incorporate into another version. You can repeat this process as many times as desired.

Improvement | **AI Era plan** | **UI-Accessibility** | **Federal**

Single acknowledgment signoff

Now, once you copy a draft narrative and sign the acknowledgment statement, you will not be asked to sign it again, even if you make edits or copy additional times. The initial signature of the acknowledgment statement will still be tracked in audit logs.

Improvement | **AI Era plan** | **Federal**

Policy Chat

Feedback on responses

Starting June 25, users will be able to share feedback on responses that were not helpful by selecting No to the “Was this helpful” message after each response.

New | **AI Era plan**

Redaction

Notebook redaction

Beginning June 30, you can now redact notebooks. This process checks the video for physical notebooks or notepads that an officer might write in while at a scene. This also includes things like vehicle registration or other paper items. For more information, see [Using Redaction Assistant](#).

New | **Admin** | **UI-Accessibility** | **Federal**

Reporting

Resolved issues

- We fixed a bug related to downloading previous reports that impacted EU1 customers only. No data or report was lost. During the duration of the bug, users could simply rerun the report.

Third-Party Video Support

This update includes the following improvements:

- Improved handling of files with truncated frames caused by interrupted uploads or downloads.
- Added support for xpa_PLCO aceformat to process a new variation of .xpa files, support for exe_mirage aceformat to handle legacy Eclipse Nubix DVR files, and support for older Aira video formats.
- Enhanced parsing for .mp4 versions of Panasonic video files.
- Improved decoding and stability for HEVC/H.264 ExacqVision video formats.
- Improved compatibility with .n3r files for more consistent playback and processing.

If you encounter an unsupported format, contact support@axon.com.

Improvement | **Federal**

Mobile

Axon App

Updated version of the Axon app required

For feature improvements, you must update the Axon app to Android version 1.1.0 or iOS version 1.3.0. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) to learn more.

Deprecated | Federal

Multi-cam tagging

This feature uses signals from multiple cameras to relate video evidence to evidence from other officers that has already been tagged, saving time and making easier to get evidence properly categorized. Officers will be able to review the suggested multi-cam evidence and verify if it is related to the existing evidence.

Beta | Federal

Transcript Keyword Search

Transcript Keyword Search is now available in the Axon app for both iOS and Android. This feature requires customers to have purchased Unlimited Auto-Transcribe add-on plan and requires users to have the “Search across Transcripts” permission enabled. See [Mobile search overview - Axon app](#) and [Keyword search across transcripts overview - Axon Auto-Transcribe](#) to learn more.

New | Federal

Axon Capture

Updated version of Axon Capture required

For feature improvements, you must update Axon Capture to Android version 5.16.0 or iOS version 5.15.0. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | Federal

Axon View

Updated version of Axon View required

For feature improvements, you must update Axon View to Android version 6.3.1 or iOS version 6.6.0. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | **Federal**

Axon Evidence Sync

Updated version of Axon Evidence Sync required

For feature improvements, you must update Axon Evidence Sync to version 3.23.3. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | **Federal**

Axon Evidence Upload XT

Updated version of Axon Upload XT required

For feature improvements, you must update Axon Upload XT to version 2.12.2. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | **Federal**

Coming soon

Axon Evidence

Redesigned Axon Evidence

A redesigned version of Axon Evidence is coming this October, bringing a fresh look and feel to the platform you use every day. The new experience introduces a modern layout, streamlined sidebar navigation, and intuitive workflows—making it easier to navigate,

organize, and take action across all your digital tools and data.

The redesigned Axon Evidence introduces a simplified new interface that adapts to how you work, with updates like light and dark mode, collapsible navigation, and improved search options with map-based filtering. The redesigned evidence detail page features expanded metadata, supports multi-cam playback, and so much more. Users can move between the current and redesigned versions throughout the rollout.

More details and training resources will be shared closer to release.

New | **Admin**

Smart Capture - Early Access

We're introducing a new Smart Capture feature in the Axon app as an Early Access option for U.S. and Canadian customers who have purchased the AI Era Plan. This new functionality enables users to scan barcodes on U.S. and Canadian driver's licenses automatically capturing information about the person. See [Smart Capture in the Axon app](#) to learn more.

Beta | **AI Era plan** | **UI-Accessibility**

Policy Chat

Early access for new regions

Policy Chat will be available for early access in the United Kingdom, Canada and Australia and New Zealand. Customers in these regions can trial Policy Chat. Contact your Axon representative for more details. For general information, see [Policy Chat](#).

New

Axon Upload XT

Migration tab beta feature

The XTMT command-line migration tool will soon become part of the Upload XT user interface with the Migration tab beta feature. If your organization is interested in trying out this Upload XT beta, fill out the [request form](#).

Beta | **UI-Accessibility**

Cameras and sensors

Axon Body Workforce

Firmware v1.2516

Releasing with general availability on June 10. Includes minor updates and performance improvements.

Improvement

Axon Body 4

To enroll devices in early access ahead of the general release, visit [Early Access Devices](#).

Firmware v1.2516.X

Releases to early access devices on May 20. This phased rollout releases with general availability targeted for June 10. Includes support for the audio Translation skill, localization support for Dutch, French, and Korean, and basic fixes and performance improvements.

Improvement | **Federal**

Firmware v1.2522.X

Releases to early access devices on June 24. This phased rollout should span three weeks with general availability targeted for July 16. Includes support for customizable battery percentage assignment for Device Pooling.

Improvement | **Federal**

Photo Marker option

Removed from the Programmable Button 2 (P2) options because it has the same functionality as the Select option. The P2 assignment for all body cameras using Photo Marker will migrate to Select for a net zero change in user workflow: pressing P2 (when set to Select) will still set a marker.

Deprecated

Resolved issues

- Firmware v1.2516.X
 - Supports manual assignment for Device Pooling. Ensures the camera does not unassign itself automatically when undocked.
- Firmware v1.2522.X
 - Improves Wi-Fi upload reliability.

Axon Body 3

To enroll devices in early access ahead of the general release, visit [Early Access Devices](#).

Firmware v1.2516.X

Releases in a phased rollout starting to early access devices in May and general availability targeted for June 3. Contains performance improvements.

Improvement | Federal

Firmware v1.2522.X

Releases to early access devices on June 24. This phased rollout should span three weeks with general availability targeted for July 16. Includes support for customizable battery percentage assignment for Device Pooling.

Improvement | Federal

Resolved issues

- Firmware v1.2522.X improves Wi-Fi upload reliability.

Axon Fleet

Firmware v2.2521 releasing

Starts with early access devices on June 24, with phased rollout spanning 3 weeks with general availability targeted for July 15. Contains the following updates as well as minor improvements.

Improvement | Federal

Tab name change

In Axon Evidence > ALPR, the tab “Record Search” is now called “Fleet Search”.

Improvement | Federal

Signal Sensor Support

The Fleet 3 Hub now supports Axon's new Signal Sensor.

New | Federal

Updated version of Axon Fleet Dashboard required

For feature improvements, update Axon Fleet Dashboard to minimum version v1.2.7115 (Windows), 1.2446.0001 (Android), or 1.2502.0001 (iOS). Older app versions will no longer be supported. See [Keep your Axon apps up to date](#) for more information.

Deprecated | Federal

Resolved issues

- Resolved user-reported issues and made performance enhancements for a smoother and more reliable experience.

Axon ALPR

Removing old ALPR service

Axon will deprecate an older ALPR service in mid-July. To ensure no interruption in the ALPR experience, update your firmware to the latest version immediately (v2.2439 or later).

Deprecated | Federal

Axon Device Manager

Updated version of Device Manager required

For feature improvements, update Axon Device Manager to Android version 3.14.3 or iOS version 3.2.6. Older app versions are no longer supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | Federal

Device Checkout

Updated version of Axon Device Checkout required

For feature improvements, you must update Axon Device Manager to Android version 1.1.0 or iOS version 2.0.6. Older app versions will no longer be supported and will display a warning when opened. See [Keep your Axon apps up to date](#) for more information.

Deprecated | Federal

Coming soon

Axon Body 4

Firmware v1.2528.X

Releases to early access devices on August 5. This phased rollout should span three weeks with general availability targeted for August 27.

Improvement

Axon Body 3

Firmware AB3 v1.2528.X

Releases to early access devices on August 5. This phased rollout should span three weeks with general availability targeted for August 27.

Improvement

Device Manager

At Axon, we're committed to delivering a secure, reliable, and innovative experience for every customer. As part of that commitment, Axon will officially end support for ADM on OS versions prior to Android 13 and iOS 17 on July 31st, 2025. Learn more at [Keep your Axon apps up to date](#).

Deprecated

TASER energy weapons

TASER

Resolved issues

- Fixed an issue where PDFs for TASER deployments weren't consistently matching users' specified profile time zones.
- Fixed an issue where unitary cartridges were not consistently showing the correct inventory when properly registered.
- Fixed an issue that caused trigger pull rejections to be logged as due to function test mode, when they were actually caused by automatic shutdown settings.

Axon VR Training

Simulator Training: Range Skills new region availability

[Simulator Training: Range Skills](#) in Solo Mode is available on June 24 for users Australia and New Zealand. The app will be available for users in the UK once the TASER 10 launches there. Learn more about [Axon VR app and device availability](#).

New | UI-Accessibility

Simulator Training: Range Skills feedback tools

Applicable [Simulator Training: Range Skills](#) exercises now include real-time performance metrics and feedback tools to improve training effectiveness. These include [Lag Time](#) (available for TASER 10 exercises only) and [Drill Summary](#) (available for all TASER exercises except for Weapon Transitions). To enable Drill Summary in the headset, go to **What to Expect > Settings > Show Feedback After Each Target**.

Learn more about these [feedback tools](#).

Improvement | UI-Accessibility

Updated Simulator Training menu bar in headset

We've updated the in-headset menu bar in the Simulator Training app for streamlined access to these key functions: Library, Pairing, Weapon Settings, and Exit App. To get this update, connect your VIVE Focus 3 or VIVE Focus Vision headset to the internet.

Improvement | UI-Accessibility

Resolved issues

- Improved the animation for a prone target experiencing partial NMI in Broken Circuit, Simulator Training: TASER 10 VR Core II, and Simulator Training: TASER 10 VR Gauntlet.
- Reduced the [Drill Summary](#) display time from 10 seconds to 6 seconds.

Coming soon

Axon VR

Simulator Training: Tactical Clearance

Axon VR will soon release a new Simulator Training content category: Tactical Clearance. These scenarios will give officers realistic, team-based VR practice in room-clearing tactics. One- or two-officer teams will navigate simplified layouts and train on key skills like movement, communication, and threat assessment.

Learn more about [Tactical Clearance](#).

New | **UI-Accessibility**

Axon Justice

Red, hollow dot indicator

Users now have a new indicator within the Justice UI to see what evidence items have not been viewed at the user level. A red, hollow dot next to the evidence means the evidence has not been viewed at the user level. The solid red dot next to the evidence continues to mean that piece of evidence is unviewed at the agency level and is new. For more information, see the [Justice Case Details Page](#).

New | **UI-Accessibility** | **Federal**

Change log

The table below contains a log of all changes made to these release notes.

Date	Product	Description of change
June 17, 2025	Initial notes created	
June 18, 2025	Updated Photo Marker information	
June 23, 2025	VR	Removed Tactical Clearance from the June release and added a new bug fix.
June 23, 2025	Policy Chat	Moved early access for new regions to coming soon.

If you have any questions about the information in this release, contact your Axon representative or Technical Support.
