

# Axon Body Workforce Camera

QUICK  
START  
GUIDE

For detailed user guides, video walk-throughs, and training, go to <https://my.axon.com/s/axon-body-workforce> (QR code above).

## Camera controls

## Docking

Place your camera in your Axon Dock to charge the battery, offload videos, and download system updates. Ensure the USB port is dry and free of dirt and debris before placing the camera in a dock or connecting a USB-C cable.

## Battery

Depending on organization settings, your camera may only charge to 90% and display **Full** to preserve battery health; this is not an error.

## Water

Your camera is resistant to water splashes but is not immersible. While it can handle exposure to rain, avoid downpours. Treat it with the same care you would use with any expensive electronic device.

## Button actions

Action	Button Presses
Lights	Press <b>Volume Up ▲</b> for three second, then tap to toggle modes
Marker, add	Press <b>Select</b> while recording
Menu	Press <b>Program</b> and <b>Power</b> simultaneously

Stealth mode, exit	Press <b>Volume Up ▲</b> or <b>Volume Down ▼</b> for three seconds*
Volume, speaker	Press <b>Volume Up ▲</b> or <b>Volume Down ▼</b>

\* The camera remembers the previous volume and light settings when exiting Stealth mode.

## Typical use

1. Ensure the Operation LED on top is green ■ when you remove it from the dock, indicating a full charge.
2. If needed, press **Power** to turn it on. The Operation LED on top flashes green ■■■■ when it's ready to record.
3. Press **Event** twice to start recording; this may include a preceding segment of buffered time as set by your admin. The Operation and Triad LEDs will flash red ■■■■.
4. Press **Event** for three seconds to stop recording.
5. At the end of your day, don't turn the camera off, just return it to any open bay to charge, upload recordings, and download updates.

**Important:** Your camera will only work at your company. Internal recordings are encrypted and can't be modified or accessed by USB cable.
