

# AI Era Plan

## Q1 2026 Update

This update includes a summary of the newest applications, updates to existing solutions, and some of our top AI resources.

## Now Available

### AI Auto-Tagging

Take the guesswork out of evidence organization. When CAD data is missing or incomplete, AI analyzes related evidence to suggest IDs, categories, and tags directly in Axon Evidence and the Axon App. Officers can review and confirm in seconds—reducing manual entry while improving accuracy, consistency, and discoverability across the system.

[Learn more](#)

### Axon Assistant — Agency Info

This new skill allows you to ask questions of your agency's trusted data and information using your voice, including information about agency policies, call-for-service data, records information, and other data managed by your agency or its trusted partners. For example, you might ask questions like: "What is our agency's policy regarding asking for an ID when someone is filming me in public?", "Lookup license plate ABC123" and "What is the suspect's description on my call-for-service?".

## Updates to Existing AI Solutions

### Smart Capture available for AI Era Plan in the US and Canada

The Smart Capture feature, now available to Axon App on iOS users in the US and Canada, enables the automated capture of driver's license information to be used in evidence and reports.

### Brief One in the Redesigned Evidence Details page

Users can view a timeline of key transcript moments and instantly navigate to the corresponding evidence for fast, focused review. Brief One will extend evidence summaries beyond transcripts to also include images and documents. The summaries will be available to view within My evidence, All evidence, and the redesigned evidence detail page.

## AI Resources

### Tampa PD is setting the bar for responsible AI in policing

Using tools like real-time translation and AI-powered policy guidance to boost officer decision-making, efficiency, and community trust. In one example, AI-driven translation on body cameras now bridges language gaps instantly across 50+ languages, eliminating delays that once took 20+ minutes. See how their approach is shaping the future of public safety in this must-read case study.

## Coming Soon

### Attribute Search

Use natural language searches, like "red backpack", to search across body-worn camera videos to quickly find people based on what they are wearing or carrying. Save time by jumping right to relevant video moments. This feature is coming soon to the AI Era plan and will appear on the evidence search page in the redesigned Axon Evidence. Contact your Axon representative to learn more or request early access

[Read Here](#)

### Form One

Automatically completes common forms utilizing data pulled from audio transcripts. Just like Draft One, safeguards help ensure data is reviewed and approved by a human officer. Axon is looking for early access partners to test Form One and provide feedback. If interested, contact Delia Koren at [dkoren@axon.com](mailto:dkoren@axon.com).
