

AXON BODY 4

Axon Body 4 is more than just a body camera — it's a partner while on shift, maximising safety and transparency with enhanced camera options, longer-lasting battery, and the ability to request support anywhere. With streamlined operation and faster charging, your team will spend less time on administrative tasks and more time on what really matters — keeping themselves and others safe. The improved security and storage options give you the confidence that your footage is secure and always within reach. Plus, the optional Flex POV accessory lets you capture every moment from any angle. Elevate your performance and safety with Axon Body 4.

Capture Scenes from Any Angle

Capture unique perspectives with the optional Flex POV accessory. Plug it into an Axon Body 4 camera to record from new angles, like head mounted, shoulders, or in-hand for viewing around corners. It's smaller, lighter, and more durable than the Flex 2, with an IP67 waterproof rating and no need for charging, resulting in maximum flexibility.

FEATURES & BENEFITS

ENHANCED CAMERA OPTIONS

Never miss a moment with our enhanced camera options. The 4:3 aspect ratio with a 160-degree field of view increases visibility by 39%, allowing you to capture more of the situation. Plus, our upgraded 5 MP sensor provides sharper images with more detail.

LONGER LASTING LIFE FOR MAXIMUM UPTIME

Don't let a dead battery leave you exposed. With a larger 3400 mAh battery, Axon Body 4 lasts a full shift even when using connected real-time services.

REAL-TIME SUPPORT*

Stay connected and in control with Axon Respond. Our real-time support system lets you view user locations on live maps, receive instant alerts to potential escalations, and even view developing situations through live streams. Plus, with the ability to upload critical recordings in the field, you'll always have the tools you need to stay ahead of the curve.

*Requires purchase of Axon Respond license

ROBUST COLLABORATION TOOLS*

Collaborate like never before with our robust real-time tools. Guards can request that designated supervisors view their body camera live streams with a single click of a button, providing an extra set of eyes on the scene. Plus, our bi-directional communication system allows for seamless communication between live stream viewers and Axon Body 4 users, making it easier to stay connected and stay safe.

STREAMLINED OPERATION FOR GREATER EFFICIENCY

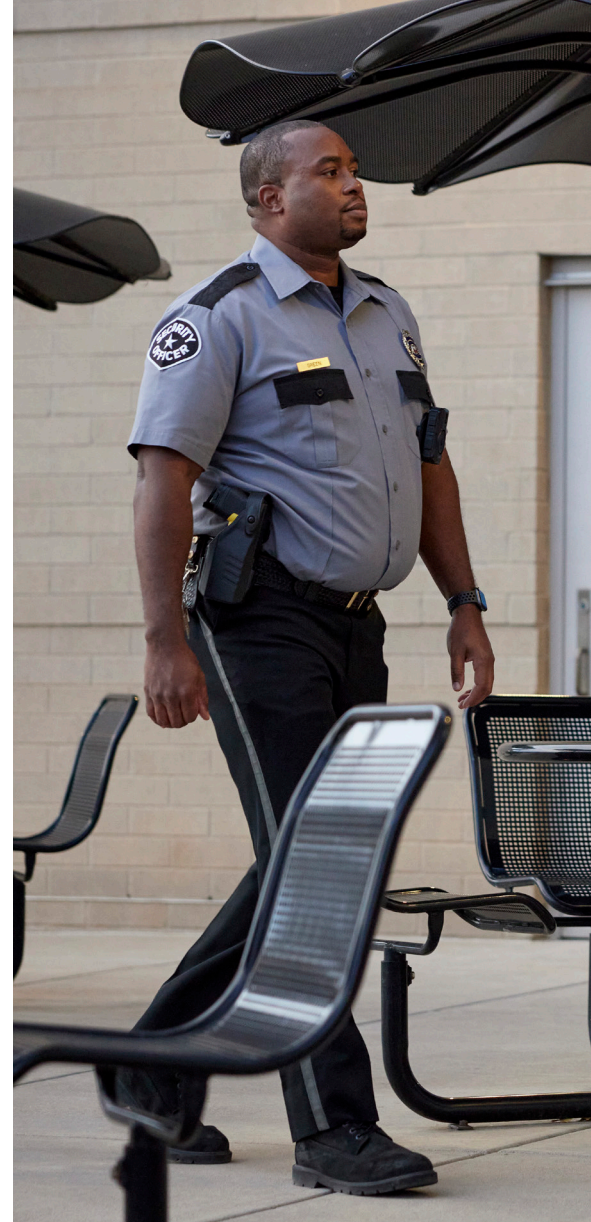

With simplified camera registration and operation, programmable buttons, mute and sleep reminders, and recording and power off confirmations, users can easily control their cameras and stay on top of their recording statuses.

FASTER, MORE CONVENIENT CHARGING

Get back to work quickly with the new magnetic disconnect fast charge cable, which delivers 20% charge to your device in 30 minutes.

IMPROVED SECURITY AND STORAGE

Capture footage with confidence knowing it is secured with XTS- AES 256 bit disk encryption. Plus, with an increased 128GB solid state hard drive, you can store even more footage and images.
