Now Available

Lead Surface

When a case spans reports, interviews, calls, and other evidence, finding what connects and what does not can take hours. Lead Surface helps investigators compare information across the case to surface inconsistencies, corroborating details, and potential leads, all while keeping each response connected to the original source material. Lead Surface was previously known as Lead Lock. Expect to see product guides and Evidence.com updates soon.

The screenshot displays the 'Field Reporting Systems' interface. It features a 'New Report' button and a 'Traffic Crash Report' section. The 'INCIDENT INFORMATION' section includes fields for Report Number, Agency Case #, Date of Crash, Time of Crash, Search Time, Arrival Time, Day of Week, # of Units, Location/Intersection, City, County, Weather Conditions, Night Conditions, Road Surface, Roadway Type, Crash Type, Crash Severity, and # of Injuries. The 'VEHICLE DETAILS' section includes fields for Vehicle #, Year, Make, Model, Color, License Plate, State, VIN, Insurance Company, Policy Number, and Towed By. A 'Form One' sidebar is visible on the right, showing 'Suggestions ready' and 'Click a highlighted field to fill it in'.

Form One

Form One is an AI-powered form assistant that makes completing web-based forms more convenient. It turns information already at hand - from another screen, a scanned ID, or your voice, into suggested form fields, reducing repetitive manual entry while keeping you in control.

AI Auto-Tagging

Categorizing video evidence can add additional steps to an officer's workflow. AI Auto-Tagging suggests relevant IDs, categories, and other metadata based on nearby body-worn camera video and available transcripts, so users can review and apply tags without starting from scratch.

Updates to Existing AI Solutions

Attribute Search now works with CCTV

Attribute Search lets users search body-worn camera and third-party video, including CCTV, with natural language phrases such as "red backpack." By helping quickly locate people based on what they are wearing or carrying across more video sources, users can spend less time manually reviewing footage. Attribute Search was enabled by default for AI Era customers in early September.

More flexible report writing with Draft One

Draft One now offers more control over draft creation and review. Users can customize report formatting, trace content to source inputs, and listen to drafts before submission. It also supports interview summaries, supplemental reports, and reports without body-worn camera footage, with an optional lightweight Microsoft Word experience.

Coming Soon

Axon Assistant

Beginning in early October, Axon will begin updating customers to an expanded Axon Assistant experience. Assistant provides a secure, CJIS-compliant way to ask questions, analyze files, and surface insights across Evidence.com, the Axon App, and Axon Body cameras. Customers will be notified before their experience is updated.

Brief One, AI Case Search

AI Case Search lets users search an entire case with plain-language queries, such as "show a blue sedan." It surfaces relevant evidence with an AI-generated summary and the matching timestamp or page, helping teams quickly focus their review.
