

Boise Cascade®
ENGINEERED WOOD PRODUCTS

BC ESTIMATOR

Efficient EWP Estimating Software

BC Estimator® streamlines takeoffs for dealers and distributors by allowing designers to trace over scaled drawings and assign product attributes with ease. Without the need for a full 3D model, teams can generate accurate material lists quickly, help projects stay on schedule, and deliver a smoother experience.

BC ESTIMATOR ADVANTAGES

- Convenient takeoffs for projects that don't require additional structural analysis
- Built-in layout and annotation tools to create jobsite-ready framing layouts
- Customizable results for customers, including trim lengths and delivery details
- Integrated with BC Connect® for easy access to project plans and customer information
- Built-in Quick Check tool reviews projects to help ensure accuracy and completeness
- Personalized onboarding and expert support help new users get productive fast — at no extra cost

Multi-Unit Material Lists, Simplified

Boise Cascade[®]
ENGINEERED WOOD PRODUCTS

BC Estimator helps simplify developing multifamily and light commercial material lists by turning one unit estimate into a scalable template for the entire project. Instead of managing material lists unit by unit, designers can replicate and revise material lists and quotes with ease. They can then be bundled by building or by unit, allowing materials to be scheduled and delivered in sync with the project's construction schedule.

THE BOISE CASCADE DIFFERENCE

With Boise Cascade, you get more than reliable engineered wood products — you get results backed by people and resources that support your success. For over 60 years, we've earned the trust of building professionals through our high-quality products, quick and dependable distribution network, technology solutions, and unparalleled support that help keep projects moving and customers satisfied.
