

Schall-Ex™ L-15 FS

the retrofit drop seal solution

athmer's Schall-Ex™ L-15 FS is a retrofit solution for acoustic isolation. While the other Schall-Ex™ models require you to prep the door for the seal prior to hanging it, the FS series allows you to get the benefits of a great drop seal on any door even after it's hung.

The FS series provides a clean solution with concealed fasteners, and optional finishes to help it blend in.

Use cases:

- Retrofit solutions
- Suitable for interior and exterior applications
- Timber, metal, and PVC doors

What makes it unique?

- Surface-mounted drop seal
- Concealed screws and snap-on cover profile

About athmer:

athmer is a leader in the drop seal market and offers solutions for doors of all type and function.

Why a drop seal?

A drop seal is designed to close the gap between the bottom of the floor and the door and the top of the door and the ceiling. The total solution ensures protection from smoke, light, noise, weather and energy loss through the opening.

Common features across athmer drop seal applications:

- Removeable actuator for easy adjustment and construction site protection
- Parallel actuation drops the seal evenly on both sides of the floor to prevent drag and ensure longevity
- Self-leveling to compensate for uneven floors.
- Can be ordered to length; stock inventory is field trimmable
