Schall-Ex™ Ultra WS

the corrosion-resistant drop seal

athmer's Schall-Ex™ Ultra WS has been engineered for use in exterior doors of all materials. Having passed a 480-hour salt spray test, this is the one you want to use in coastal or other corrosive environments.

Use cases:

- Ideal for use in high humidity and coastal environments
- Suitable for hinged timber and metal doors or gates

What makes it unique?

- Salt spray test to EN 1670, Class 5, (480 hours)
- Stainless steel springs and rust-proof internal mechanism

About athmer:

athmer is a leader in the drop seal market and offers solutions for doors of all type and function.

Why a drop seal?

A drop seal is designed to close the gap between the bottom of the floor and the door and the top of the door and the ceiling. The total solution ensures protection from smoke, light, noise, weather and energy loss through the opening.

Common features across athmer drop seal applications:

- Removeable actuator for easy adjustment and construction site protection
- Parallel actuation drops the seal evenly on both sides of the floor to prevent drag and ensure longevity
- Self-leveling to compensate for uneven floors.
- Can be ordered to length; stock inventory is field trimmable

The "latch" actuator of the Ultra drop seal can be handed on site.
