

## Schall-Ex™ L-15/30 WS Pivot

*best-in-class sealing solution for pivot doors*

athmer's Schall-Ex™ L-15/30 WS Pivot is a heavy-duty, state-of-the-art solution for sealing pivot doors that can be combined with many standard pivot door fittings.

The standard press-in actuator is replaced with an adjustable roller actuator that allows the door to be opened in both directions and is suitable for various frame designs.

The magnetic seal systems only tighten when they are positioned on top of each other and the pivot door is at the zero point. Otherwise, the door leaf swings smoothly in both directions.

### Use cases:

- For opening in both directions
- For single and double-leaf timber pivot doors

### What makes it unique?

- A four-sided sealing system without visual drawbacks
- Sealing to the top and bottom
- Suitable with single-acting pivot doors

### About athmer:

athmer is a leader in the drop seal market and offers solutions for doors of all type and function.

### Why a drop seal?

A drop seal is designed to close the gap between the bottom of the floor and the door and the top of the door and the ceiling. The total solution ensures protection from smoke, light, noise, weather and energy loss through the opening.

### Common features across athmer drop seal applications:

- Removeable actuator for easy adjustment and construction site protection
- Parallel actuation drops the seal evenly on both sides of the floor to prevent drag and ensure longevity
- Self-leveling to compensate for uneven floors.
- Can be ordered to length; stock inventory is field trimmable
