

Rainstop™ L-24/20 WS

the ultimate weatherproof solution

The athmer Rainstop™ drop seal offers a superior weatherproof solution for exterior wood doors. This multi-chamber silicone seal keeps driving rain and storm winds from penetrating.

Use cases:

- External hinged doors
- Doors subject to extreme weather events

What makes it unique?

- Protects against wind and driving rain
- Zero-threshold solution for universal design

About athmer:

athmer is a leader in the drop seal market and offers solutions for doors of all type and function.

Why a drop seal?

A drop seal is designed to close the gap between the bottom of the floor and the door and the top of the door and the ceiling. The total solution ensures protection from smoke, light, noise, weather and energy loss through the opening.

Common features across athmer drop seal applications:

- Removeable actuator for easy adjustment and construction site protection
- Parallel actuation drops the seal evenly on both sides of the floor to prevent drag and ensure longevity
- Self-leveling to compensate for uneven floors.
- Can be ordered to length; stock inventory is field trimmable
