

Dimensional Stability and Strength for Your Sheathing Needs

Excellent for Walls, Roofs and Sub-Floors

Blue Ribbon[®] OSB is an outstanding choice for wall sheathing, roof sheathing and sub-floors. Its multi-layered construction gives it stability and stiffness for your sheathing needs. And it lies flat for easy installation.

Strong and Consistent

Blue Ribbon engineered wood panels have racking strength, impact resistance and uniformity for the consistency you need to keep your jobs running smoothly. They're manufactured to not have voids, knots or splits and have an exclusive blue edge coating to help reduce moisture absorption.

The Sub-floor Advantage

Blue Ribbon OSB Sturd-I-Floor[®] combines the sub-floor and underlayment into a single product. Its smooth surface makes it perfect for the direct application of carpets and pads as well as hardwood flooring. And it's available with both square and tongue and groove edges.
