Your guide to CallRail's AI-powered customer journey

Turning leads into loyal customers means winning at every stage of their journey. CallRail's AI-powered platform helps you pinpoint what's working, attract more quality leads, and convert every opportunity — fueling smarter decisions and real growth for your business.

Call Tracking & Form Tracking
### Know exactly which marketing drives your best leads

Stop guessing which marketing channels work. **Call Tracking** and **Form Tracking** provide a clear picture of the customer journey by attributing every call, text, and form submission to its source. This lets you stop wasting budget and focus on what truly delivers results.

Result: Reduce cost per lead by **20%** by connecting marketing activity to real outcomes.

> Optimizing campaigns with CallRail has drastically decreased the cost per click and cost per lead — which is a main focus for us."
>

Premium Conversation Intelligence™
Turn more conversations into customers

Smarter conversations lead to smarter growth.
Premium Conversation Intelligence™ is your always-on engine for turning every conversation into insight. Unlock access to tools that quickly prioritize the leads most likely to convert.
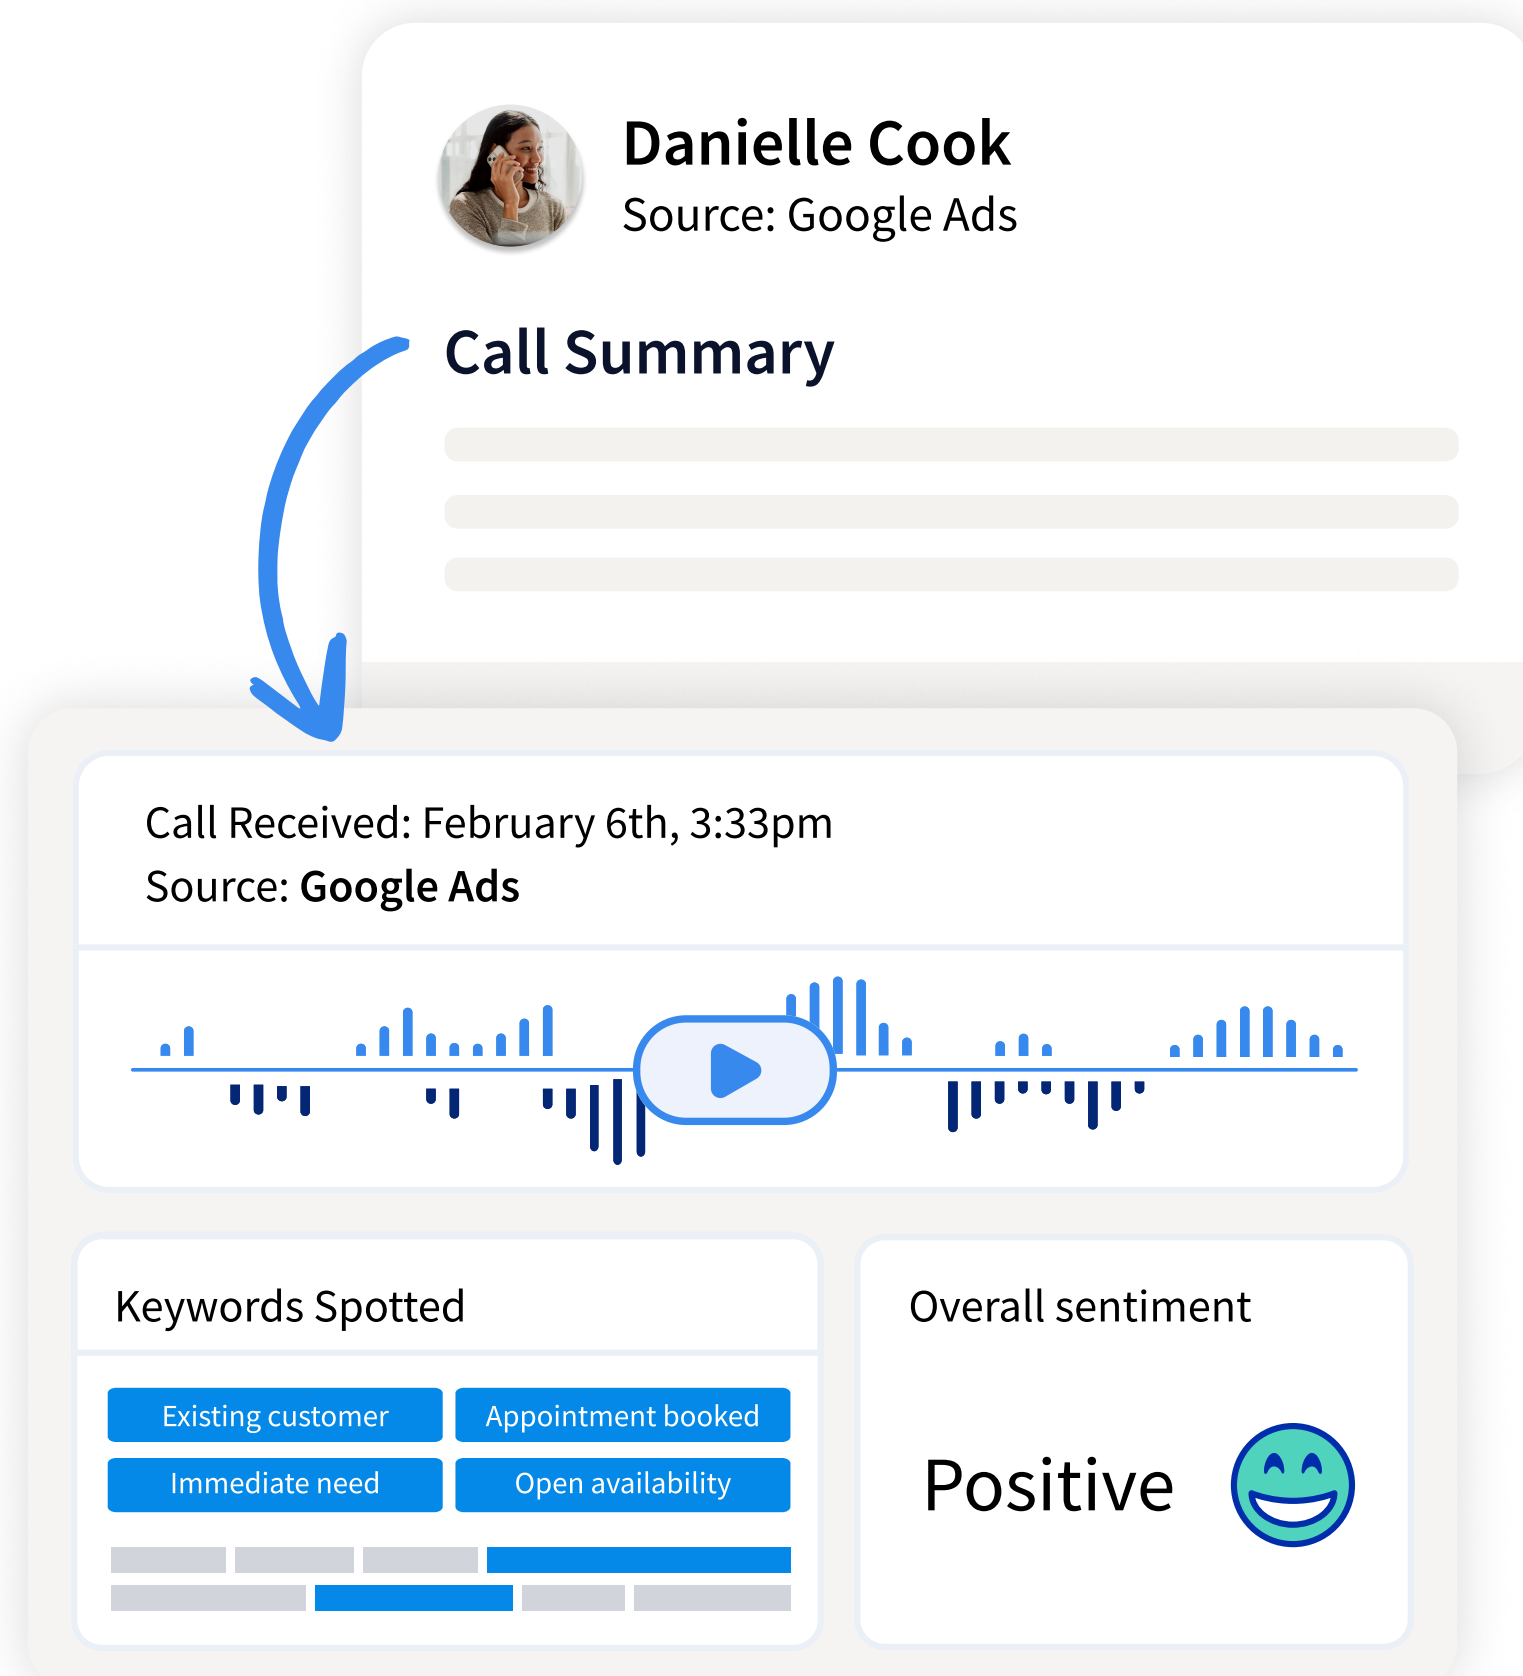

- Transcribe, analyze, and summarize conversations.
- Automatically tag leads based on conversations.
- Surface keywords and sentiment that reveal buyer intent.
- Access enhanced reports on campaign and attribution insights.

Result: Businesses using Conversation Intelligence® spend up to 50% less time qualifying leads.

> The ability to glance at a call to determine the context of it, search a transcript, and quickly move around is only made possible by Premium Conversation Intelligence. Time is money and so are conversions. I think this feature helps me with both.

Voice Assist
Never miss an opportunity

What happens when a great lead calls after hours? With Voice Assist, CallRail's AI Assistant, you can answer, capture, and qualify inbound calls and texts 24/7. Now you can scale your marketing beyond business hours, ensuring every lead is a captured opportunity, not a missed call.

Result: Businesses using Voice Assist increased their average answered call rate by **44%**, turning more missed calls into live conversations.

> In just six weeks, our answered calls increased by 118%. Voice Assist is helping us turn more calls into customers."
>
