

Mechanical Lock + Electronic Key

Cleo™

The Combination Reimagined

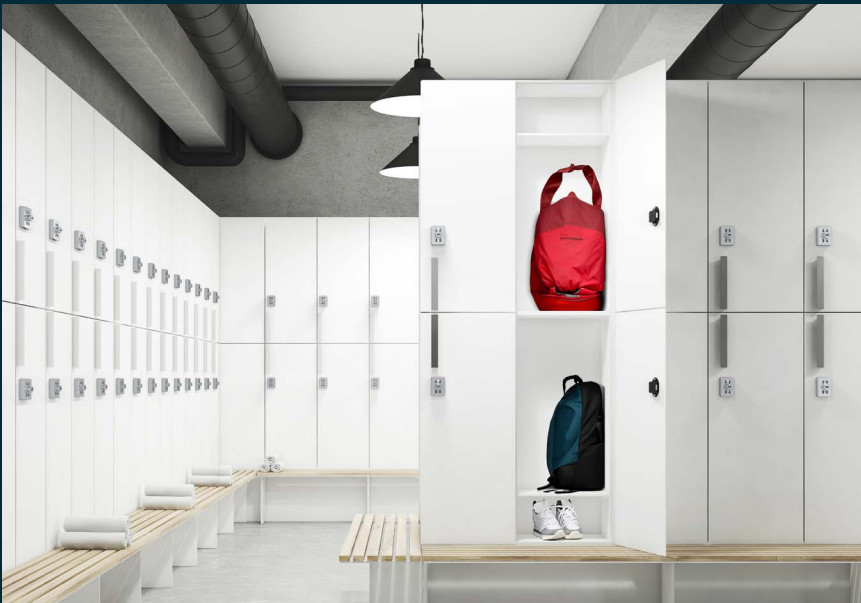

Cleo is a true first-of-its-kind, enlisting the innovation and reliability of Digilock to create the next-level mechanical combination lock. Battery-free. Wire-free. Maintenance-free. All managed by electronic key. Imagine a locker room solution designed for convenience, simplicity, and durability – that's Cleo.

Digilock®

Designed with the user experience in mind, Cleo offers intuitive lock operation, shared and assigned use capability, easy retrofit, rapid programming, and minimal management. Additionally, our all-new auto-scramble feature automatically resets the dials to zero after each use, ensuring convenience and security for each user.

Cleo effortlessly blends electronic efficiency with mechanical reliability, providing a versatile and budget-friendly storage solution for small to mid-sized businesses. Engineered to retrofit existing locks with a standard three-hole pattern, Cleo eliminates the need for new drilling, ensuring an easy installation process.

Simple, attractive, and cost-effective – Cleo sets the standard for simplified security.

Functionality

Choose the use case that's right for you.

Shared Use

A simple day-use solution, shared use functionality lets the user pick any available storage space and enter any 4-digit code to lock and the same code to unlock. When the current user is done and the storage space is unlocked and vacated, it's open and ready for the next user and code.

or

Assigned Use

If you need to assign storage for a longer period of time, assigned use allows management to program a single code to the lock for the user or users. Users enter the assigned 4-digit code to open the lock. When done the user simply shuts the door, and turns the knob to the locked position.

Management

Digilock's Flex Key offers reliable, cost-effective security, and flexibility in a single electronic key.

- Electronic override, programming, and reset
- Simple replacements for lost or stolen Flex Keys
