

ChemEyes

Let's clean up your chemical storage—safely and smartly—with our school chemical management program.

Over the years, many schools collect chemicals that are no longer used—or safe. Some materials that were once common in classrooms are now considered dangerous. Even worse, many of these chemicals become more hazardous as they age, putting your students, staff, and school at risk.

That's where ChemEyes comes in. Available to schools insured through EMC, this program helps you assess, manage, and safely dispose of outdated or risky chemicals.

What could be hiding in your school?

- Potential explosives
- Controlled substances
- Radioactive materials

Where are these chemicals often found?

- Science labs
- Art rooms
- Industrial tech shops
- Custodial closets

What's included in ChemEyes

Our team will guide you through every step:

- On-site assessment
- Inventory of chemicals for disposal
- Disposal cost estimates*
- Training for your staff

Why schools trust ChemEyes:

- Helps staff safely store and dispose of chemicals
- Simplifies chemical management and disposal
- Reduces risks to students, staff, and the community
- Offers expert guidance and peace of mind

Contact your local insurance agent or EMC's loss control team at ChemEyes@emcins.com to set up a ChemEyes consultation.
