

Construction safety services

We have the right tools for the job

At EMC Insurance, we're here to do more than provide policies and process claims — we're here to protect you, your employees, and your business. Our safety experts can help you proactively reduce your risk exposure through loss control strategies and safety services designed specifically for contractors.

Protection to help cover every square inch

Loss control solutions are crucial for contractors because they address the top causes of fatal work injuries, known as the “fatal four”—falls, electrocutions, struck-by object accidents, and caught-in between accidents. By addressing these dangers proactively, contractors can help save nearly 600 lives each year, making job sites much safer for everyone.

To support your safety efforts, we offer a range of specialized services:

Jobsite assessments

Our team evaluates your worksite for potential risks to your employees and operations, providing practical solutions to help keep everyone safe and protect you from liabilities.

Industrial hygiene services

We evaluate and monitor employee full shift and task-specific exposures, including silica, chemical, dust, and noise, to capture data that will determine the necessary control strategies to protect your employees.

Hazard control assessments

We identify hazards that pose the greatest potential safety risks to your worksite and employees and recommend viable solutions to address them.

Fleet safety solutions

Our suite of auto resources helps you avoid costly accidents by providing driver monitoring, training, and other essential tools to keep your drivers safe and your business moving forward.

Vendor partner resources

We partner with MindForge to offer you online safety training, CJ Cooper, for drug testing and awareness, and Intellicorp, to provide quality and compliant background screening—and these are just a few of our vendor partnerships you can take advantage of.

Visit emcinsurance.com/losscontrol to learn more and access our extensive collection of free online safety resources. Or set up a consultation with our loss control representatives by contacting your local independent insurance agent, EMC loss control representative or email losscontrol@emcinsurance.com.
