

Tailored loss control for manufacturers

We're here to do more than provide policies and process claims—we're here to protect you, your employees, and your business. Our safety experts can help you proactively reduce your risk exposure through loss control strategies and safety services that add value to your policy—without tacking on extra costs to your premiums.

Expert on-site services

At EMC, we go beyond the basic loss control survey. Our experienced field teams, engineers, safety consultants, and industrial hygiene professionals will work with you to help create custom workplace safety plans for your manufacturing business. Here are just a few of the expert on-site safety services we provide:

Hazard control assessments

We'll pinpoint the most critical safety hazards in your operations and offer practical solutions to minimize or eliminate them.

Reconstruction costs evaluation

By conducting a commercial property valuation, we can provide the necessary information to help you and your agent determine what coverage best meets your needs.

Slip and fall risk assessments*

Protect your workforce and maintain productivity with our proactive approach to reducing slip and fall incidents, which will ultimately lower the risk of injuries and related expenses.

Driver safety

Our suite of auto resources helps you avoid costly accidents by providing driver monitoring, training, and other essential tools to help keep your drivers safe and your business moving forward.

Industrial hygiene assessments*

Our experienced industrial hygienists are ready to help with hazardous noise assessments, monitoring your air quality/ventilation, and chemical management assistance.

Ergonomics evaluations*

Our experts will help you address ergonomic concerns to enhance employee comfort and productivity while minimizing the risk of work-related injuries.

*Available to EMC workers' compensation policyholders.

Safety at your fingertips

Creating and maintaining a safe workplace is an around-the-clock effort. To help keep safety top of mind and at your fingertips, we provide a wide variety of online tools and on-demand trainings available whenever you need them. It's like having a dedicated safety specialist right in your pocket.

Safety program templates

Use our customizable templates to keep your organization safe and in compliance with various regulations.

Forms

Simplify your operations and mitigate risks effectively with our expertly crafted surveys, checklists, and reporting documents.

Tech sheets

Access valuable insights with our wide range of tech sheets. From machine safeguarding to lockout/tagout procedures, empower your operation with timely and practical safety information.

Safety briefs

Improve your safety meetings with these short safety talks, designed to help keep your employees informed and vigilant about workplace hazards.
