

Contractors worksite limited pollution

This endorsement is available for use on contractor accounts to provide limited pollution coverage at their job sites since many contractors will face pollution exposures.

Whether contractors are working as a land grader or as a landscape contractor, EMC has CG7276 worksite limited pollution coverage available to address exposures that the contractor brings to the worksite. Coverage is provided for third-party damages and clean-up costs because of environmental damage.

Coverage applies for any pollution incident that:

- Occurs at a worksite
- First commences during the policy period
- Ceases within 72 hours of commencement
- Is reported within 30 days of the commencement

Coverage is limited to a separate schedule of limits of insurance and property damage deductible.

Limits available

Available pollution incident/pollution liability aggregate limits are as follows:

- \$100,000/\$200,000
- \$250,000/\$500,000
- \$500,000/\$1,000,000
- \$1,000,000/\$2,000,000

Property damage deductibles

Property damage deductible options for each pollution incident are:

- \$1,000
- \$2,500
- \$5,000

Why a contractor may need worksite limited pollution coverage

Here's just one example of how this coverage can help protect your client:*

Heavy machinery springs a leak. The run-off of fuel makes its way into a nearby neighborhood lake, damaging fish, and land around the lake. Property damage totals \$100,000, including clean up. The worksite limited pollution endorsement could help a contractor pay for these damages.
