FormAssembly

Mission-Ready Data Collection

The trusted solution with FedRAMP High Authorized Environment + IL4 Support

High Assurance

- Data Encryption (FIPS 140-2)
- Identity & Access Management (MFA/SSO)
- Continuous Monitoring (ConMon)
- Data Residency & Sovereignty
- Audit Trails & Logging

FormAssembly Snapshot

FormAssembly provides a FedRAMP High authorized data collection platform, designed to meet the rigorous security requirements of the U.S. Federal Government and Department of Defense.

Through our partnership with FedHIVE, we offer a path to rapid deployment for workloads requiring Impact Level 4 (IL4) assurance. Because we operate in a FedRAMP High environment, your Path to ATO is pre-paved. We provide the documentation; you provide the mission.

The Compliance Advantage

- **FedRAMP High Authorized:** Unlike "Moderate" tools, FormAssembly is architected to handle the government's most sensitive unclassified data in cloud computing environments.
- **DoD IL4 Support:** Built for the Department of Defense to manage Controlled Unclassified Information (CUI) and other mission-critical data.
- **Procurement Ready (SAM.gov):** Active registration (UEI) in the System for Award Management, ensuring no administrative blockers during the acquisition phase.

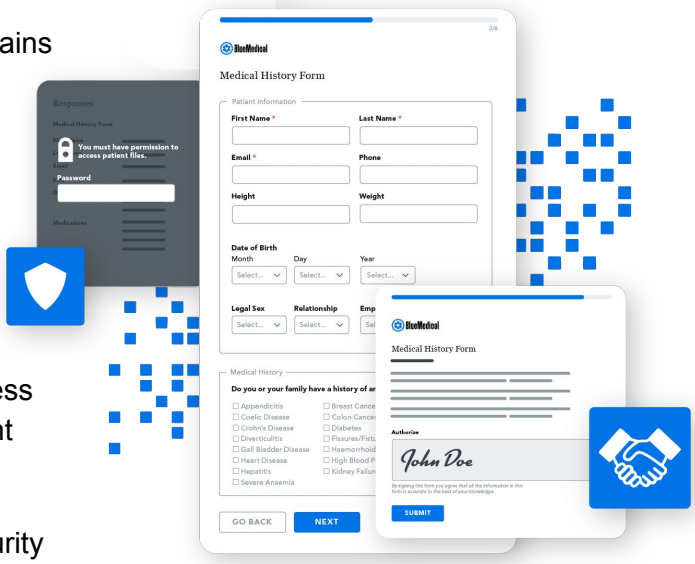

FormAssembly

Core Capabilities for the Mission

Secure External Intake: Streamline program applications, veteran/citizen services, and vendor reporting.

Internal DoD Workflows: Manage HR actions, IT ticketing, and incident reporting that involve sensitive personnel data.

Automated Routing: Move data through complex approval chains with full audit logs and encryption at rest and in transit.

Why Federal Teams Choose FormAssembly:

FormAssembly provides the secure data intake layer federal agencies need to modernize workflows without triggering endless security reviews. By operating in a FedRAMP High environment with support for IL4 workloads, we help you get to "Live" faster.

Accelerated Deployment: Eliminate the "start from zero" security hurdle.

Procurement Ready: Active registration in **SAM.gov** for immediate eligibility.

High Assurance: Built for controlled data collection and sensitive workflows.

Future-Proof: Avoid the "rip and replace" cycle as security requirements tighten.

Let's Chat!

FormAssembly is procurement-ready for federal buyers - active in SAM.gov and built for regulated environments. Talk to our team to learn more.
