

### QUICK SPECS

**VOLTAGE**

18V - 36V

**WEIGHT**

15.8 - 33.2 lbs. / 7.2 - 15 kg

**HEIGHT**

4.42 - 21.5 in. / 112.3 - 546.1 mm

**POWER**

115V - 230V

## HYTORC Electric Power Supply

### AC/DC Power Converter

The **HYTORC Electric Power Supply (EPS)** is an accessory that delivers continuous power to HYTORC electric torque tools. This AC to DC power converter is an optional power source intended to be used in place of an 18V or 36V Li-Ion battery pack. Eliminating the need to swap batteries on repetitive bolting jobs, the HYTORC EPS boosts overall productivity through dependable continuous operation. The EPS can be plugged into either 115V or 230V systems with a 6 ft. AC and 20 ft. DC cable, which allows the operator to access a wide range of bolting applications. It has dual voltage versatility making the EPS compatible with both 18V and 36V HYTORC electric torque tools\* (when equipped with an applicable adapter). The EPS automatically detects the type of tool connected and supplies the appropriate power, providing flexibility at the worksite when using other HYTORC electric torque tools.

\* Check with your HYTORC rep for specific model compatibility.

- DUAL VOLTAGE
- WALL MOUNTABLE
- PORTABLE
