

Metallized Films

Features & Benefits

- One- and two-side treated
- Wide seal range options

Applications

- Adhesive and extrusion lamination options
- Flow wrap, HFFS and VFFS packaging lines
- Cold seal applications
- High moisture-sensitive products

Metallized Film

Product Code	Thickness (µm)	Description	WVTR / OTR	Application
ZWP	15 - 30	One-side sealable – SIT 95C	Good	Inner web for extrusion lamination
Z3S	25, 30	Ultra low sealing – SIT 76C	Good	Inner web for extrusion lamination
Z2S	15, 18	Very low sealing – SIT 76C	Better	Inner web for extrusion lamination
CXM / CXP	15	Two-side treated – Cold Seal	Better	Inner web for adhesive or extrusion lamination cold seal
ZWF	18	One-side sealable – SIT 95C	Best	Inner web for extrusion lamination
DZ / DZS	18	Solid white, one-side sealable – SIT 95C	Best	Extrusion lamination for snack packaging
KWM	25	Solid white, one-side sealable – SIT 93C	Good	Laminations that require superior seal strength
