

# Inteplast Protective Packaging

From durable machine and hand stretch films to high performance shrink and stretch hood films, Inteplast Group is your one-stop-shop supplier of industry-leading protective packaging films.

## Protective Packaging Films by Inteplast

For many brand owners and manufacturers alike, sourcing quality suppliers of protective packaging films can be a headache. At Inteplast Group we make things simple for our customers by providing a complete portfolio of protective packaging films that cover a wide variety of markets and applications.

From high performance hooder films to a versatile range of stretch films, we have options available for your needs.

### Hooder Films from IEF: Dedicated Service Meets Unrivalled Performance

With over a decade of legacy experience in supplying hooder films for a broad range of applications, Inteplast Engineered Films (IEF) has developed a hooder film portfolio that is built for performance. Additionally, IEF offers a dedicated technical support team focused solely on hooder films – a unique service rarely seen elsewhere in the industry.

### AmTopp Stretch Films: Strength and Efficiency

Our team will work with you to achieve the lowest cost per load effectively shipped. Refusing to compromise on film quality, AmTopp's stretch films yield relatively high holding forces, protect from dust and damage, and are amongst the most economical methods of unitizing. We offer specialized films for all your packaging needs, including color, UVI, and freezer films.

## Hooder Films from IEF

IEF is uniquely positioned to support customers utilizing both stretch and shrink hooder machines. We have both high stretch and high containment options available, and can customize our blends.

Hooder films also diverts waste from landfills as it reduces the use of packaging materials.

### Applications

- Bagged chemicals & resins
- Building products
- Corrugate & paper
- Food & beverage
- Household appliances (white goods)
- Insulation
- Lawn & garden products

### Stretch and Shrink Hood Films

IEF's stretch and shrink hood films feature industry-leading performance and consistency. Our innovative portfolio of films was specifically designed to improve upon common performance issues typically seen with existing films on the market.

- Superior stretch/shrink properties
- Excellent containment force for load stability
- High puncture and tear resistance
- Available in a variety of widths and sizes
- Customization options available including ultraviolet inhibitors (UVI)

# AmTopp Stretch Films

We have simple solutions for the most complex applications. AmTopp Stretch Films are ideal for wrapping pallets, providing unitization, and providing environmental protection for loads.

Our Hand and Machine films are broken out in four series of films.

## Stretch Film Series

- Engineered Ultra High Performance
- High Performance
- Premium Value
- Specialty

## Hand Stretch Film

AmTopp Hand Films range from coreless options to save on waste disposal, to the very best in thin gauge films. High cling freezer films, UVI, and color films for your specialty needs complete our hand stretch film offering.

- We assist you in selecting options for your specifications.
- Five strategically placed plants support our distribution and national accounts.

## Machine Stretch Film

AmTopp Machine Films offer the most complete portfolio in the industry and our engineers utilize the newest technology for the manufacturing processes.

- Various performance ranges are designed for many applications.
- Our highly engineered film is competitively priced.
